Ar Sing Sing, N. Y., on Monday, at 12:401/2, Carlyle Harris was electrocuted of the department, with the exception for the murder of his wife. A current of 1,760 volts passed through his body and death was pronounced instantaneous by the attending physicians. Harris' last words were : "I have one further observation to make. I desire to say that I am absolutely innocent."

For a century past, the center of population in the United States has been moving westward at an average rate of a yard an hour, or one foot every twenty minutes. While the westward movement has covered no less than nine and one-third degrees of longitude, it has run almost on a straight line, the variation of the extreme northern and south-

CITY OR COUNTRY?

What Should Be the Rule

Purposes? A case is in the supreme court of the state, coming from Hastings, the decision of which will be looked for with considerable interest, not only at Hastings, but in other cities somewhat similarly situated. The contest is between the city of Hastings and Joe Hansen. In 1887, before the boom struck Hastings, Hansen owned a fine farm which lay on the east of the town just without its limits. During the boom, when all the adjacent farms were platted and the that he is what he purports to be, and city limits extended, Hansen's farm was taken in with the rest. In fact at that time it was very good city property, or was considered so by some, and he was best society we have on file—that is to offered \$60,000 for it, which he refused. But Hansen was liberal and gave twenty

acres of his finest land to the Hastings

Since that time he has towels and a fire, are being opened to been paying city taxes on the balance of his farm. He finally concluded that while it was extra good farm land, there was not much in it as city property, so he brought action before Judge Beall in district court to have it set outside the city limits and taxed only as farm land. A decree was granted in his favor, but portant matters and if the juke has not the city appealed. They think they had better fight it out now and win if they can, because there are others who would likely follow Hansen's example and the city thus be deprived of considerable of the round of pleasure he is now enjoyits revenue. The article from which we condense this account says that the general sentiment is in favor of Hansen

[From our regular correspondent.] Gen. Harrison must smile when he reads of democrats claiming credit for the administration for its financial policy. The administration has no financial policy, or if it has the public has

And as one of the ladies has been that it is bad to have the sun he appointed for temporary duty has since received a regular appointment from Secretary Morton it looks as though "Uncle Jerry" was talking sense, as he usually does. None of the sensa-tions promised have been brought out by this investigation, which is daily becoming more farcical. The democratic commissioner of pen-

sions goes on duty this week, and much interest is felt in his actions. All sorts of rumors are current about his intentions, but as his acts will soon begin to speak for themselves I shall wait before criticising. Judge Lochren is so highly spoken of by those familiar with him during, and since the war that it seems only fair to do this.

Political converts have been, since here were political parties, more zealous than the old party war-horses, and Secretary Gresham has proved that he is no exception to the rule. He has made more changes in the important positions in the state department than have been made in any other department, and what makes this all the more Chauncey M. Depew, died in New York striking is that it has been an unwritten rule of that department since it was esstablished that no changes should take place on account of a change in the head of the two or three men whose relations with the secretary are of a confidential nature, and that unwritten rule has been observed by all the secretaries except Gresham. He, although not yet wo months in office, has left only one important place unchanged—third assistant secretary-and the reason for that exception probably lies in his in-ability to find a democrat possessing the peculiar qualifications needed to perform the duties of Mr. Adee, the pres-

My apple trees have the same limbs on that started the first or second season after they were grafted, consequently they bear young and are very healthy, and I am never troubled with any insects on my trees. Another fraud is budded apple trees, but as a great Monday. many tree men brag them up so much we have to grow some of them, also. For years, Nebraska tree-growers have been trying to remedy the scorching of the southwest quarter of the trunks of the trees, and it looks as though this method of Mr. Tannahill's would be a specific. We think, however, that our friend John is a little too sweeping in his denunciation of tree agents. Having himself been somewhat in the business. he may know some things the rest of ns don't. WAVERLY, IOWA, Nov. 15, 1892,
G. D. Bruce Tudor, Esq.,
Dear Sir: After wearing your glasses three weeks I feel I cannot say enough for them, nor for your special method of skillful fitting.
For the past eighteen years I have been a constant sufferer from defective sight (Compound Myopic Astigmatism). Nothing I could get was satisfactory until your examination which I noticed was strictly scientific, and inspired me at once with confidence in your ability.

I now have no trouble in reading the finest print by night or day; and to all those in need of glasses I most cheerfully recommend you as a Scientific Optician.
