This talk of lack of confidence has been made to cover a multitude of sins political and otherwise. In the genera acceptance of the term, especially among democrats, the "lack of confidence" is confined entirely with the people. But there is a barometer which shows that the hard times are not brought about because the people have lost confidence in themselves. For the first time since the resumption of specie payment by the republican party United States bonds are quoted as low as 96. This shows without further explanation that the people lack confidence in the government and the democratic administration.- Nebraska City Press.

Cheap Property, Dear Money.

Ex-congressman Laws (republican), of this state, is very decided in his views of the situation. Certainly, just now the time for all who know anything about money to tell it for the good of the country: been wholly nullified since its passage

by the authorities at Washington. Executed in its intent that law would not only have furnished a market annually for 54,000,000 ounces of American silver, but would have added at least that many dollars every year, to the circuas all agreed to supply the place of national bank notes at that time being retired by the banks at the rate of \$2. 000,000 per month. But as construed and executed it has added nothing worth mentioning to the circulating medium and is now being charged with all the evils forced upon the country by the enemies of silver, who are demanding dear money and cheap property. Eng. lish capital is immensely interested in the action of the coming congress, and it has stopped the coinage of silver in India to lower the price and discourage the friends of silver in America. Should congress repeal the Sherman law without any provision for the use of silver as money, one of the greatest and most important interests of the west and northwest will have been crippled if not ruined. Silver will have been slaughtered in the house of its friends, in the home of its production and greatest usefulness. This will have been done at the demand of a foreign foe, a tyrant who insists that we shall have cheaper Should this be done thousands of strong men who have been profitably for their labor which they may not

It is becoming more and more evident daily that Governor Crounse cannot defer action in regard volves good, hard dollars, to the extent to Mr. Garneau without bringing upon himself the reproach of nearly every man and woman from Nebraska who visits the exposition. The extravagance and political nobility. He recently let go of incompetency shown in the preparation of the exhibit has been followed by gross waste of public funds in the maintenance of the exhibit. The world's fair exhibit is now a stench in the nostrils of the people of the state, and i the governor does not hasten to correct his error in retaining Garneau he will find before the expiration of his term of office that his business is held by the people to be a stain upon his record too great to be overlooked or forgiven. Rumors are flying thick and fast of ar intention on the part of the free coinage democrats to bolt the democratic caucus and vote for the republican caucus nom ince for speaker, in order to defeat the administration program, which includes other counties north and west of Omaha, the re-election of Speaker Crisp. The new house will have a total membership of 356, of whom 128 are republicans and 13 populists. Should 38 of the 215 democrats bolt the democratic caucus it works. would be possible to defeat Crisp, but while it is possible, no well informed person considers it probable. It is more likely that these rumors are started for the purpose of obtaining concessions to the democratic silver men in the make up of the house committees through the fear of Crisp and the administration that such a combination might be made While the republicans could not pre vent the populists and bolting demo crats voting for their nominee for speaker if they wished to do so, they do not as a rule regard the election of republican speaker now as a very desirable thing.

Dear Sir.—After wearing your glasses three
weeks I feel I cannot say enough for them, nor
for your special method of skillful fitting. for your special method of skillful fitting.

For the past eighteen years I have been a constant sufferer from defective sight (Compound Myopic Astigmatism). Nothing I could get was satisfactory until your examination which I noticed was strictly scientific, and inspired me at once with confidence in your ability.

I now have no trouble in reading the finest print by night or day; and to all those in need of glasses I most cheerfully recommend you as a Scientific Optician.
