It is a larger book than the directory for last year, but resembles it in other respects. There are 1,680 pages of names in the new directory to 1,516 pages in the old. Each page contains the average of 305 names in three columns. Calculated at this rate there are about 512,000 names in the new directory, against 471,530 in the issue

The directory is the largest published in the United States and is twice the size of the directory published ten years ago and three times as large as the one published twenty years ago.
