Ar different places around the state they are having trouble with heating apparatus in school buildings. In sev eral places, even during the warm weather we had previous to the late cold snap, the heat was not sufficient to keep the children warm, and what will it be when cold weather sets in for good? There is considerable nonsense on the heating question, as on a great many other things. Steam is probably the cheapest. if not the safest, for large buildings; hot water, where it can be looked to carefully day and night is probably the most satisfactory, but for all-around work, with all kinds of janitors, &c., hot at 3:00 p. m., and arrives at Pittsburgh air is doubtless the best, and with a good, the next morning at 11:10. more plainly shown than by measure than it was generally expected to be. Mr. Cleveland has actually compelled democratic members of the House put articles on the free list against the rotest of their democratic constituents and with the full knowledge that such action would bring want to many people in their districts and states. This may

ggerated in the slightest degree. How has Mr. Cleveland obtained sufficient control over democratic members of the House to compel them to vote away the welfare of their friends and constituents? has given them petty offices for their personal followers and has promised them that if they fail to get renominated and elected to the Fifty-fourth Congress he will provide for them personally. Chairman Wilson, of the committee on Ways and Means, who has betrayed two of the greatest industries of West Virplaced on the free list, is understood to have been promised a lifetime position on the bench of the U.S. Circuit or District Court as a reward for his treachery to the interests of his state and people.

The same policy is to be carried out to get votes for the Cleveland tariff bill-it box; a good packer will get in half as is a misnomer to call it by anybodyelse's name-in the House, and will probably succeed as well as with the committee. But when it comes to the Senate these tactics will not necessarily succeed. The average Senator is always more independent than a member of the House. But even while trying to do the sneak act he has proven his complicity in what will be regarded by posterity as one of the most dastardly state crimes in American history by ransacking the State Department record and giving out for publication in administration newspapers isolated letters which seem to bear out his theory, or, as ville Courier Journal is not satisfied.
