the previous crop, and it only needs will be kept wet. That means sickly there. This time his matrimonial venture seems to have terminated

The Story of the Opal.

There is a beautiful little story told about the opal, that delicate stone which you have no doubt seen in rings

and bracelets. The story is that the opal was long ago promised to anybody who could discover it. It lay hidden away, so the old fortune tellers used to say, at the place "where the sunlight and the moonlight joined each other." and whoever could find that spot would be rewarded by a quantity of large, beautiful opals.

After a long search for the place "where the sunlight and moonlight place to keep them in. can afford to married life the lady ran away with joined each other," the place was found by a Spanish traveler, who followed up the rays of the setting sun; and when he had reached the end of the last ray, he waited until the moonbeams shone upon the earth and there he found the improves by use under healthy condiopals. They are said to be very lucky

stones for those who are born in the fall of the year, and very unlucky for have the greatest exercise of their visthose born in the spring. Of course it is only a saying that these are lucky or the sun have the best eyesight. Genunlucky, but the rest of the story is erally speaking, savage tribes possess true, as you will believe if you look in hunting. Natives of the Solomon isthe heart of an opal and see the pink tints of the sun and the blue rays of lands are very quick at perceiving distant objects, such as ships at sea, and the moon nestling in the middle of it.
