But the words were indistinct again; Dolly heard no more.

She had risen from the hammock and was standing, white and still, in the glare of the electric light. The stars were mocking her now above the lower light, and the breezes were whispering of the twenty years that had rolled over her, carrying her lit is a pleasure to find in any business concern an absolute regard for truth. "The Dispatch" and Found to Be Absolutely Tree in Every Particular-Mr. Rochrig Tried the Most Pamous Medical Men of Europe and America and After All Hope Had Fled Came Home and Was turnd by the Cook Remedy Company.

[Cor. Chicago Daily Dispatch.]
In these days of fraud and deception it is a pleasure to find in any business deserves the thanks of everybody. Such a concern is the Cook Remedy company, which is located in suite 307 Masonic temple in this city.

The standing and reliability of this company has heretofore been tavorably commented upon by the Dispatch, and just now it comes to the front with a cure so remarkable that an account of the reading public. The case in ques-tion has been fully investigated by the Dispatch, and the following recital of it can be vouched for as absolutely true in every particular.

A Truly Matvelous Cufe. The case in question is that of M. Roehrig, a prosperous young Germanma, but that in time was cured. Some time ago he contracted blood poison. treated the intelligent and refined illustrations of peculiar merit and value, says the Washington Post These were no less, in fact, than a series of glimpses into the parlors. drawing-rooms, libraries, halls and sleeping apartments of such wealthy New Yorkers as could be induced to turn their dwellings wrong side out for the gratification of vulgar curiosity. We have often con-fessed, with pain and humiliation. our inability to understand the aristocracy of the great metropolis. The Cook Remedy company treats That they are aristocrats we have every reason to believe, because they admit the fact themselves. Even if they denied it. however, or refused to testify at all, we should know them for superior beings. since no people could be so scoruful of others, so complacent as to their which have attracted the attention of own superiority, and so calmly and the medical profession, which had al-most invariably pronounced the cases world without the divine right of world without the divine right of exaltation. The New York Herald recently

first adopted it. We know why Mount Everest looks down upon other mountains, because we can see that it is loftier than they, but why the citizens of New York look down upon the citizens of other towns is a conundrum we unfolded the Herald's panorama, fer it occurred to us that possibly an inspection of some specimen New York interiors might furnish us with light not obtainable from the very minutest inspection of the New Yorkers themselves. We said to ourselves: "Ha! here in the fireplaces, the coal scuttles, the wall paper, the bric-a-brac, the bedsteads, the doormats and the crockery of these inexplicable beings we shall read the secret of their high nobility." We said: "Ha!" several times, in fact, and we fell to examining upholstery and appraising furniture and looking under beds with all the ardor of a searcher for inspiration. We still say, "Ha!" We say it with firm and fearless emphasis. But we flounder in darkness as hopelessly as ever. For us, at least there is nothing more suggestive in this parade of New York eating and sleeping paraphernatia than there has hitherto been in the spectacle of the individual New Yorker. It strikes us as being gaudy, ostentatious, vulgar, in bad taste-and that is all. If we were inclined to doubt the superiority of the New York aristocrat, instead of being honestly anxious to understand it. we should feel moved to thank the

This wonderful plant shoots forth from the frozen soil on the first day dependent jury, neither to be brow-beaten nor led by the nose. In 1635 of about three feet; it blooms on the third day, remains open twenty-four | A. ANDERSON, hours and then returns to its original elements. It shines for a single day, then the stem, leaves and flower are converted into snow. The leaves are three in number. The flower is star-shaped, its petals about as long as the leaves and about half an inch wide. On the third day the extremities of the leaves show little glistening specks, like diamonds. about the size of the head of a pin. These are the seeds of this queer flower. On one occasion some of these seeds were gathered and hastily transported to St. Petersburg. They were there placed in a bed of snow, where they were kept until the first of the following year, when the snowflower burst forth and was greatly admired and wondered at by
