Synopsis of Supervisors' Proceedings. [Official.]

WEDNESDAY a. m., Aug. 22, 1894. Board met at 9 o'clock a. m. pursuant to ad Phillips clerk. Roll call and full board present. The petition of W. M. Mason and others for the varation of a part of the Cross Line road, was on motion of Sup'r Elliott rejected. Sup'r Thomazin voting no.

August Dudschens appeared before the board omplaining of their action in the allowance of his claim for damages caused by location of the Sauter road. Sup'rs Kiernan, Pollard and Lisco appointed a committee to investigate and re-

the board and called their attention to the fact hat owing to the almost complete failure of the crops the present year a great number of the people of this county would necessarily be in lestitute circumstances and while in this pleasant weather we are apt to treat the matter lightly but when winter is upon us and fuel, food, winter clothing and feed for stock must be provided then will we realize the wisdom of taking early action looking toward the providing of some kind of public work and thereby helping the people to help themselves. He called attention to the inadequate provision of our laws permitting the expenditure of public money for the upport of the poor; of the absence of any statute authorizing the issuance of bonds for the purpose of improving highways, thereby furishing employment for the unemployed and suggested that in view of the existing conditions, that inasmuch as a company had recently been formed for the purpose of constructing an rrigation and power canal from the western coundary of the county to the eastern at an estimated cost of \$200,000, and as the law recognized such enterprises as works of internal improve ment and authorized the issuance of bonds in aid thereof, that there be submitted to the electors of this county a proposition to issue the bonds of the county in aid of said canal enter prise in the sum of \$150,000 or such an amoun as may be deemed necessary, said bonds to draw interest at the rate of 5 per cent and to be payable 30 years from their date, on condition that said canal company will execute and deliver to the county first mortgage bonds on its entire plant for the like amount of \$150,000 payable 30 years from their date and drawing interest at the rate of 5 per cent after 15 years from their date and the further condition that the work upon said canal will be commenced at once and proceeded with as fast as circumstances will permit and that said work shall be done by the people of the several townships of the county in proportion to their assessed relation. portion to their assessed valuation on certificate from the supervisor of each township showing that they are entitled to receive the work and that reasonable wages shall be paid therefor. He suggested that no action be taken at this meeting but that each supervisor discuss the
