DAIRY--LIVE STOCK.

INTERESTING CHAPTERS FOR OUR RURAL READERS.

Department of the Home-Saved—Hints as to the Care of Live Stock and Poultry.

Prof. H. H. Dean of the Ontario agricultural college addressed a convention as follows: Ten cows, perhaps, is the average number which a farmer should have...

The first requisite is that these ten cows shall be owned and cared for by a dairyman or dairymen. You say, "Oh, what a simple thing to say!"

He (or she) should be neat, clean, a good feeder, kind, thoughtful, and should have business ability to buy and sell intelligently...

Painters on Geese. An exchange says: Three or four geese to a gander are all that should be allowed...

Home Dairies.—To make a success of this it is necessary to have plenty of room for stables, proper drainage, and a knowledge of how to make butter or cheese...

City or Town Milk Trade.—A good city milk trade is very profitable. It is necessary to have a good supply of milk, and to have it delivered in a clean and sanitary manner...

Creamery.—Creameries in Ontario are of two classes—cream gathered and separator. In the former cream is only taken from the farm and the skim milk left for feeding...

WHEAT RAISING AND LAB.—The crop is a favorite with immigrants, because our free prairies can be broken at small expense and cultivated with little labor...

ORCHARDS PAY.—We observe a disposition on the part of some agricultural journals to discourage fruit growing, and especially the planting of apple orchards...

EYE FOR FALL PASTURE.—Many Polk county farmers sowed rye to provide fall pasture for their stock, just before they cultivated their corn the last time...

MANURE FOR FARMERIES.—No other fertilizer is nearly so popular among growers as stable manure. In reply to questions sent to growers asking what fertilizer is found to be most satisfactory...

CHEESE FACTORY.—In sections where factories pay by the hundred, to make money out of cows (and out of your neighbors) get those cows that give a large quantity and send every drop of it to the factory...

REPEATING THE WORMS.—F. E. Sanborn says: I have a very good method of repeating the worms in an orchard management to keep fruit free from worms...

SUCCESSFUL WOMAN FARMER.—Miss Mary E. Cutler of Hilltown, Mass., is a successful farmer. She became sole manager of Winthrop gardens, an estate of sixty-eight acres...

Utilizing Waste Products.

The Elgin Dairy Report tells how J. T. Polk of Greenwood, Ind., combines horticulture and dairying.

Mr. Polk is one of the largest canners of corn and peas, and has utilized the refuse from these two products by utilizing them as feed for his dairy cattle. This utilization of what has heretofore been waste product to the growers of these articles for canners, shows the evolution of the times, and what can be done by a practical farmer in many ways.

The first requisite is that these ten cows shall be owned and cared for by a dairyman or dairymen. You say, "Oh, what a simple thing to say!"

He (or she) should be neat, clean, a good feeder, kind, thoughtful, and should have business ability to buy and sell intelligently...

ASIDE from the fact that the cheap baking powders contain alum, which causes indigestion and other serious ailments, their use is extravagant.

It takes three pounds of the best of them to go as far as one pound of the Royal Baking Powder, because they are deficient in leavening gas.

There is both health and economy in the use of the Royal Baking Powder.
