The readers of this paper will be pleased to learn that there is at least one dreaded disease that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the

remedy, Syrup of Figs. Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from

every objectionable substance. Syrup of Figs is for sale by all dru; gists in 50c and \$1 bottles, but it is manutactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

AN EMINENT SOUTHERN LAW-YER'S LONG CONFLICT WITH DISEASE.

Twenty-five Years of Prosperity, Adversity and Suffering. - The Great Victory Won by Science Over a Stubborn Disease:

[From the Atlanta, Ga., Constitution.] Foremost among the best known lawyers and farmers of North Carolina Stands Col. Isauc A. Sugg of Greenville. Mr. Sugg has resided in Greenville twenty-two years. While nearly every one in Pitt county knows Mr S.'s history, perhaps all do not know of his return to business again after an illness of sixteen years. No man has gone through more than he and lived. It was a case of the entire breaking down of the nervous system, attended by excruciating, agonizing, unendurable pain. Opiates and stimulants only quieted temporarily, and all treatments failed him. Only his love of family and friends prevented suicide. He told a reporter the following interesting

"I kept at my work as long as I could. but nature gave way at last and I succumbed to the inevitable. My entire nervous system had been shattered by the stimulants and opiates I had taken, my weight had dropped from 173 pounds to 123 and it seemed to everybody that the end was in sight. Why, I could not bear the gentle hand of my wife to bathe my limbs with tepi I water. I was simply living from hour to hour. I had made my will, settled my business and waited for the last strand of life to snap. "It was at this time that a somewhat

similar case as my own was brought to my notice. This man had suffered very much as I had, his life had been despaired of as mine had, and yet he had been cured. Think what that little word meant to me-CURED. The report stated that the work had been accomplished by a medicine known as Dr. Williams' Pink Pills for Pale A story is told of a wealthy but People. I investigated the report thoroughly and found that it was true in detail. Then I procured some of Dr. Williams' Pink Pills and began taking them and began to get better. I began to sleep like a healthful child, sound, calm and peaceful. My appetite came back and my nerves were scothed and restored to their normal condition and I felt like a new man. But the greatest blessing was the mental improvement. I began to read and digest, to formulate new plans, to take an interest in my law practice, which began to come back to me as soon as my clients realized that I was again myself. After a lapse of ter years I ride horseback every day without

fatigue.
"That Dr. Williams' Pink Pills saved my I fe is beyond doubt, and I am spreading their praises far and wide." inquiry about the town of Greenville sub tantiated the above facts of Col. Sugg's case, and that many others are being bene fited by Dr. Williams' Pink Pills. Dr. Wil iams' Pink Pills are for sale by all druggists, or may be had by mail from Dr Wi liams' Medicine company, Schenectady, N. Y., for 50 cents per box, or six boxes for \$2.5).

Sunflower Oil.

John Quimble, secretary of the National Grange, writes thus of the sunflower as a producer of oil: The discovery of sunflower oil as a food was an accident. It being recommended to a Russian farmer to prevent sickness; he tested its remedial values and then began to use it as food to his family and cake to his stock. So popular for oil and food has the sunflower industry of Russia become, that in 1881-2 there were 367,889 acres in cultivation; in 1886-7, 704,496 acres. Seed is of the large and small varities, the latter used for oil, the former eaten the same as peanuts. A Russian farmer gives the yield of seeds at 1,450 to 1,600

pounds per acre. An American chemist, living in St. Petersburg in 1868, made a compound lard, taking sunflower oil as the base, which was pronounced superior to hogs' lard in every respect for domestic purposes. Some of this compound was sent to a food exposition in Holland, and took the first prize as pure refined hogs' lard. He then produced, from the same oil, oleomargarine, which also took a premium as creamery butter. From the residuum of the oil he manufactured fine washing and toilet soaps, which are standard brands in Europe and South America. Druggists use the refined oils in preparing liniments, salves and hair lotions. When properly treated, it is used on the most delicate machinery as a lubricator. SUNFLOWER OIL CAKE.

The annual output of all the sunflower oil mills in value is estimated at \$1,700,000 for the oil only. Oil cake is put at \$600,000. The oil cake is largely consumed in Russia, Germany, England, Sweden, Denmark and Holland, as feed for cattle. The stock raisers and farmers of these countries regard the oil cake as the best food to be obtained for cattle. They claim for it superiority over hemp or rape seed for producing flesh on beef cattle, and equally as good for increasing the supply of milk in milch cows. A German farmer reports that he increased the flesh on an ox three pounds per day by feeding on sunflower oil cake. These people also hold it in high esteem as a horse feed. They say it produces flesh and gives the hair a lively, slick appearance. The dried cups are fed to sheep, and the faulty seeds are used as feed for barnyard fowls. In many sections where wood is scarce the stalks and shells are used as fuel. which answers as a good substitute. The ash from the sunflower contains a large per cent of potassium. Experiments have proven that 1,000 pounds of dried stalks vield 57 pounds of ash and from 1,000 pounds of ash 350 been heard from. The 150 farms sold leaves nothing to be desired. Frozen turtle from the South seas | Jones—What's the big policeman tained. According to the analysis of chemists, the ash of the sunflower Stranger-What's the name of this contains about 30 per cent of potas-"Are you sure?" "Oh, yes: I've heard | scientists that if the soil is very rich, the plant will take up 50 per cent of potassium. The ashes are sold to soap to have been sold, and the total exmakers. From the fiber of the stalk writing paper, which bear a close re-

Flax Culture in Europe. Our principal supply of the raw material, says Chambers' Journal, is imported from Russia, where the plant more extensively than in any other country in the world; but there the culture of the crop and preparation of Mother-Johnny! On your way the fiber receive less care and attention than in any other flax-producing under crop and also by much thinner sowing than is practiced in other coun-Physician, with ear to patient's tries in order to give the plant greater to prevent it being laid during the vioin half by hitting the under tor Please don't reduce it too much this treatment, however, is a coarse fiber and also a very much inferior yield to that grown thicker and under more favorable circumstances of soil and attention in its early stages. Germany, Austria and France will follow Russia as flax producing countries, and in each of these an average area of over two hundred thousand acres is kept under this crop. In Holland flax is grown principally for the seed, and the planting and growth of the crop. as well as the time for pulling, is regulated for this purpose. By properly maturing the seed the quality of the fiber is injured and renders the subsequent process more difficult; but the Dutch farmers are amply remunerated by the high price obtained for the seed, which has for agricultural purposes a world wide fame, and is chiefly sown in Britain, although Riga seed is also used and preferred by some growers as being more hardy. It is Belgium, however, to which we must turn to see flax in the highest state of cultivation, where nothing is neglected that can in any measure improve the quantity, and more especially of the quality of the crop. Here proper rotation of the crops, superior tillage and liberal manuring of the land are attended to in a manner not seen elsewhere, and to this the careful, plodding Belgian farmers owe their success in raising other crops as well as flax, and which has earned for them painting, sculpture and literature, it the reputation they enjoy of being owes its most powerful charm to nather the most successful agriculturists in

Omaha, Neb. When to Sell. A potato grower of long experience, discussing the question of whether it was better to sell or hold the crop says: My opinion is that it is undoubtedly best to sell at 50 cents per bushel at digging time, even if one were assured of double the price four months after storing. Handling, shrinkage and deordinary noise upon those that are weak and cay in four months usually reduce the unstrung. As a nervine, Hostetter's Stomach amount stored about one-third, and I Bitters is unrivalled. By promoting digestion have never found out when to market
