

mere preponderance of language that is led in quantity only by that of the professional politician. The result is not conducive to the best business interests of the country.

If we are to judge from the disgrace ful and dilatory tactics of the New York state legislature, a lack of legislative business wisdom is not confined to congress. State and national affairs need as much careful attention as is given to the management of a prosperons business. There should be due considaration and discussion upon important and weighty topics, but there is no ocin theless discussions or wind bag orstory. Such is of no earthly use It. convinces nobody; it changes no votes. Upon important national events the minds of statesmen are agreed either for or against the best interests of the country. Why not, then, at once get down to the actual business in hand instead of waiting weeks or months, wasting the money of the people and the time of their representatives, who would often ing at home? The representatives of the Fifty-fourth compress have already been elected. We are not aware exactly how many busihers men there are among its members. but we do hope that there are many who will endeavor to impress upon their fel-low legislators the desirability, the necomity, of strict attention to busiless. if prompt legislation and of prompt adut. Let us see for once if it be not possible to have a businesslike con-

case to be pro rated.
