THE KING CURE OVER ALL FOR RHEUMATISM. NEURALGIA SCIATICA 18

Before buying a bicycle said to be "just as good as a Columbia" it is well to compare the prices at which the machines sell second-hand. The second-hand price of Columbias often equals or exceeds the NEW price of the "just-as-good." If you look a year ahead, there is wise economy in

STANDARD OF THE WORLD

POPE MFG. COMPANY * HARTFORD, CONN.

4th PRIZE CONTEST

The first prize will be given to the person who constructs the longest sentence in good English containing no letter of the alphabet more than three times. It is not necessary to use every letter of the alphabet. The other prizes will go in regular order to those competitors whose sentences are next in length.

Every competitor whose sentence reaches twenty-two letters will receive a paper covered volume containing twelve of Wilkie Collins' novels whether he wins a prize or not. This contest closes April 15, 1896. The prize winners will be announced one week later and the winning sentences published. In case two or more prize-winning sentences are of the same length preference will be given to the best one. Each competitor must construct his own sentence, and no person will be allowed to enter this contest more than once. Sentences cannot be corrected or substituted after they are received. Residents of Omaha are not permitted to compete, directly or indirectly.

RULES FOR THE SENTENCE-(No Others Furnished.) The length of a sentence is to be measured by the number of letters it contains, but no letter can be used or counted more than three times. No word except "a" or "I" can be used more than once. The sentence must consist of complete words. Signs, figures, abbreviations or contractions, etc., must not be used. The pronoun "I" and the article "a" will be accepted as complete words. Proper nouns cannot be used. Each contestant must indicate by figures at the end of his sentence how many letters it contains.

This remarkably liberal offer is made by the WEEKLY WORLD-HERALD, of which the distinguished ex-congressmen.

WILLIAM J. BRYAN, is Editor, and it is required that each competing sentence be enclosed with one dollar for a year's subscription. The WEEKLY WORLD-HERALD is issued in semi-weekly sections, and hence is nearly as good as a daily. It is the western champion of free silver coinage and the leading family newspaper of Nebraska.

Weekly World-Herald, Omaha, Neb.

FIRST contest closed February 28, 1865.
SECOMD contest closed May 20, 1865.
THIRD contest closed February 15, 1866.
Winner of Knabe Piano in third contest was D. D. Light, Trenton, Mo.
Winner of \$100 cash prize in same contest was Mrs. Mary L. Dunbar, Garrison, Neb.
Winner of \$50 cash prize was Mrs. Florence Thornton, Washington, D. C.

ment our correspondent refers to very M. Gunning, in Farmers' Review,

A "Well-Intentioned" Poultry Raises. For about thirty years I have raised oultry, for twenty-three years as an adjunct on the farm, and for the remaining seven years I have been raising them in the city suburbs. On the farm I did not confine myself to any special breed, but usually kept wellbred males, Dark Brahmas, Partridge Cochins, Buff Cochins and so forth. For

the past seven years I have bred Plymouth Rocks exclusively, and think they are the best general-purpose fowl, maturing early. They are good layers and sitters. They also give a good sized roast when brought to the table. My fowls have never had very good accommodations in the way of housing, and they sometimes get their combs and gills frozen, but I am always intending to do better by them next winter. For grain feed, corn is my main reliance, supplemented by what table scraps we get. We make a good deal ourselves, and get considerable more from city families. This winter I am supplying them with sugar beets from the cows rations, which they seem to pick at with

and think I could sell more if I had the pluck to advertise more. Those left over we usually dress and sell to private families, at full retail prices in the shops, which average about 10 cents per pound. Occasionally we sell some early chicks at 12 to 15 cents per pound winter now, but I "expect to next winter," when I get my ideas carried out. We lose some fowls occasionally from different causes, but have never had silos being built now than ever before | what I consider an epidemic of cholera and more in use to-day than ever be- or of any other disease. I have never fore. Here and there are localities used an incubator, but have relied on the old method, frequently getting from 12 to 17 chicks in a brood. Seventeen

lous herds have been slaughtered. There are few men that feel like destroying their own property for the good of the public. We see the same spirit manifested among people in the case of contagious diseases, such as smallpox. Many people that get it make a strong fight to have the matter hushed up, although they know that in

many more to the contagion. The same is true of tuberculosis, I s an exceedingly dangerous and destructive disease, communicating itself from man to animal and from animal to man. All of the authorities should attempt to stamp it out, but in doing so private interests must be sacrificed to the good of the whole community. The men that oppose it have to have a plea to make their argument effective in the eyes of the public, and their argument is that tuberculin does not correctly diagnose the disease. However, statistics disprove their assertions, and finding a case or two where the test seems to have failed has little argumentative effect on the whole case. We have heard like arguments against the value of vaccination for smallpox; nevertheless, statistics of hospitals, armies and even whole nations are overwhelmingly on the side of vaccination.-Farm-

How Anthrax Is Carried.

Too great care cannot be used in the case of anthrax making itself manifest in any locality. If an animal has died of the disease, the germs may become spread in a number of ways. Even the persons making an examination of the carcasses are likely to carry away the germs on their boots. If the carcass is exposed to vultures, the

germs are still more widely spread.

Four years ago there was an outreak of anthrax on ten farms in Delaware. About 40 cows and 9 horses were affected. Of their owners four persons took the disease. There seemed only two ways for it to have come. One was by the possible introduction by fected localities. The other possible source was the Morocco leather imported from the old world.

dairy cows, cows yielding rich milk. was ever formed on low, wet lands and coarse, rank food, and the best of breeds grown elsewhere must in a few generations deter orate under such conditions. That a breed grown under such conditions can, in a long series of genbreeding.-Jersey Bulletin.

Mr. Gadd-Well, why don't you go?

land pastures, and fed on rich food. All such attempts are but waste of time. money and labor, when breeds are already to be had built up by nature and improved for centuries by skillful Mrs. Gadd-Oh, I'm just dying to get out and tell Mrs. Gabb all the awful

ground, otherwise the surface soil will about the Bliffkins family, where she

8. Pigs confined in pens and fed on It has been proven in Europe that grass alone, mostly lucerne, for ninetyeven scraps of tanned leather and bits one days, lost over a quarter of a pound of hair can convey the disease. Especially is this possible by means of the manures composed of the sweepings of such factories. Making Breeds-No breed of rich
