As soon as I found this nervous habit fastening itself upon me I was sorry that I had not always carried large sums of money and got used to the sensation, but it was too late for vain regrets, and I determined to make the best of it. But I decided that I would always in the future have plenty of

It was a little too early in the season for the summer run of schoolma'ams on the lakes, and there were only a few passengers on board the steamboat. These were made up mostly of commercial travelers and a fair assortment of those dusty-booted, slouchhatted, shoddy-clad men who travel on trains and boats everywhere without any apparent reason or object. There was one lady on board.

There was also another passengera red-headed man with a sinister eye and a smell of horse about him so promounced that the lady passenger asked for "the radish" at dinner, thinking to avoid hurting his feelings by saying horse radish in his presence.
