A COUNTERFEITER CAUGHT.

The Police of Syracuse Make an Imperi

ant Capture. On Monday the 15th, Harold Marquisee, Utica, N. Y., was arrested in Syracuse, .. on a warrant sworn out by the Dr Williams' Medicine Co., charging him with forgery. On the lith of December Marquisee visited a photo-engraver in Syracuse, saving he was the representative of the Dr. Williams' Medicine Co., and arranged for the making of a full set of plates for the direction sheets, lables, etc., of the famous Dr. Williams' Pink Pills for Pale People. News of this reached the home office, and no time was lost in arranging for his arrest when he should return for the plates. He returned on the 15th and was accordingly

arrested and is now in jail in Syracuse awaiting examination.

This arrest proves to be an important one. In addition to various plunder, such as medical books, typewriters, rugs, etc., found in Marquisee's trunk when arrested, the police also found counterfeit coin both in the trunk and on his person; and in in the trunk and on his person; and in a search of his apartments at Utica found a complete outfit for counterfeiting consisting of crucibles, bellows, nickel, lead, blamuth, antimony, a small blacksmith forgo, a charcoal furnace, and several plaster-of-paris molds. The United States marshals want him just as soon as the Dr. Williams' Medicine Co. are through with him, and, no doubt, he will be sentenced for a long period.

for a long period. In selecting Dr. Williams' Pink Pills for his counterfeiting operations, he showed his knowledge of the proprietory medical business; for these pills are in such great demand that they are easily sold at any drug store in the United States. His scheme was to work the country druggists and sell his imitations at a discount of from 2 per cent to 5 per cent., explaining the reduced price by the fact that he had picked them p in small lots and at a discount from ers who were over-stocked. By work ng fast and making long jumps, he would a short time. The proprietors of Dr. Wil have caught the rogue, before he had fair-y started, and to have thus kept these ous goods out of the market.

WASHINGTON, April 6 .-- R. C. Graves nd J. S. Menken, representing the citizens' relief committee of Memphis. Tenn., organized for the purpose of relieving the people of the flooded country tributary to that city, prepared the following statement, which they submitted to the President to-"From Marion, Ark., north of Mem-

phis to Greenville, Miss., there are now at least fifty towns and villages under water and a territory extending from 100 miles north of Memphis to 200 miles south and five to forty miles wide is submerged and devastated by the flood. Hundreds of thousands of acres of cultivated soil with growing crops are included in the submerged territory and there are from 50,000 to 60,000 people whose property has been destroyed and whose business has been suspended thereby. The amount of damage to property is incalculable. In addition to the growing crops which have been destroyed, thousands of head of working stock and of cattle have been drowned and starved. The great majority of the sufferers are small farmers, mostly negroes, who with the present crop destroyed and their working stock and farming tools swept away, are ieft utterly destitute and unprepared to begin work again even after the floods have subsided. The extent of the suffering has grown beyond the capacity of the local authorities and of private local charities

Draining Silver Mines. The drainage of the great silver mines in the West is an expensive undertaking at times, and the drainage tunnels are frequently driven under conditions as dangerous as those which are encountered in tunneling under rivers. One of the greatest of these tunnels in the country is that just completed at the Ontario mine, about a mile and a half south of Park City, Utah. It runs 15.490 feet into the mountain at a grade of three inches in 100 feet.

"Fear," said the Russian general Skobeleff, to a subordinate "must cease when a man reaches the grade of captain." Every officer under him was expected, when the occasion came, to lay down his life as an example to his men. "I must show my men how badly the Turks aim." he said while standing as a target on a rampart of a trench at the siege of Plevna. "I know how to cure him of exposing himself," said a soldier in the trenches. "The first time he jumps on the rampart let us all jump atter him." They did so, and Skobeleff, who could not bear needlessly to expose his men, jumped

A prominent building owner, with years of experience, gave the following instructions to his architect: "I have had my experience with kalsomine and other goods claimed to be as good as Alabastine. I want you to specify the durable Alabestine on all my walls; do not put on any other manufacturers' dope, if they furnish it for nothing. Alabastine is right, and when I cease to use it I shall cease to have confidence in myself or my own judgment.

Sorry to Part With Mr. Amerte. "Mr. Smarte," said the head of the firm, "I happened to overhear your criticisms this morning of the manner in which business is carried on here. You appear to be laboring under a mistaken idea. As a matter of fact we are not running this house to make money. Not at all. We carry on this business simply as a school for the in . struction of young men. But as you seem to know so much more about business than we do, it would be only wasting your time to keep you here. The cashier will settle with you. What is our loss is your gain."—Boston Transcript.

Reforms Need More Than a Day To bring them about, and are always more complete and lasting when they proceed with steady regularity to a consummation. Few of the observant among us can have failed to notice that permanently healthful changes in the human system are not wrought by abrupt and violent means, and that those are the most salutary medicines which are progressive. Hostetter's Stomach Bitters is the chief of these. Dyspepsia, a disease of obstinate character, is obliterated by it.

Live ricity at Sea. The first sailing vessel to be lighted by electricity is said to have been the Spanish bark La Vigusea, a bulk oil and general cargo carrier. She is fitted throughout with incandescent ghts, the power for the dynamo being furnished by a small oil engine, which also furnishes power to pump her o'l cargo when she is loading or unloading.

advance of science, however, has made this idea obsolete, and today with the use of Krausers' Liquid Extract of Smoke it is possible to quickly, economically and successfully smoke meat without a fire. This liquid extract is made by distilling the smoke from hickory wood and is absolute ly harmless. In fact, meat smoked by this method has a genuine smoke flavor, remains moist and soft, and is not infested with insects. Every objection of the eld method is overcome, every trouble ended and the unsightly and dangerous smoke house is a thing of the past. Krausers' Liquid Extract of Smoke long ago passed the age of experiment, and thousands are using it today with profit and satisfaction. By writing E.
