TO ALL SUFFERERS:- I write this for handled by our people. It is but little from it, unsolicited and out of pure the benefit similar sufferers may derive In September of 1887 the disease

known by the medical fraternity as hupuserethemustosus first made its appearance on my face and soon spread across the nose and over a greater part of the face, causing unsightly sores, Sunday, August 8, and Monday, August After nearly ten years of constant doctoring with many noted physicians and deriving temporary benefit at times, my system at last reached a stage of complete collapse, and I was flat on my back with no ray of hope. At this stage I was recommended to try Dr. Lieber of Omaha; after an examination he said he could cure me. As a drowning person grasping at a straw I entered his private hospital, and in a short space of time I was able to leave the hospital a well woman. My face is now clear and shows but little sign of the dread disease. While in the hospital there were also removed from my body seven cancers, and that without the use of the knife The medical fraternity scoff at the idea of cancers being removed without the knife. But I am a living proof that it can be and is done by Dr. Lieber. To all those poor mortals who have given up the battle against this dread disease.

I say don't despair, but consult with the doctor. I make this statement out of the coolest and shadiest in the state. 3t pure sympathy for similar sufferers, and will be glad to see or answer any inquiries in regard to my case.
