CURES RHEUMATISM. ETC.

Wonders The most prevailing afflictions that for a century have been engaging the most scientific skill of the medical world are rheumatism, neuralgia, catarrh, asthma, la grippe and their kindred ailments. The country is full of sufferers from these complaints. Although the most learned experts of the medical profession have labored for a century to produce a curative, until quite recently no positive results were effected. To the Swanson Rheumatic Cure Co., 167-69 Dearborn street, Chiago, belongs the credit for having produced the new remedy. It is being extensively advertised under the trade mark of "Five Drops." The trade mark is self-explantory. Five dreps make a dose. The effect is magical. In days gone by other alleged cures have been marketed with the

promise to take effect in thirty days or more. Five Drops begins to cure at once. Immediate relief is felt. In order to more effectively advertise its merits the company will for the next thirty days send out 100,000 of their sample bottles of this positive cure for 25 cents a bottle by mail prepaid. Large bettle, 300 doses, \$1 (for thirty days 3 bottles \$2.50.) Those suffering should take immediate advantage of this generous offer and write Reckless, so it could point its paragraph, them to-day.

There are 110 mountains in Colorado whose peaks are over 12,000 feet above the ocean level. Four of these of Paducah, Ky., and each of whom are higher than 14,000 feet, and more than one-half of that number are so ed a walnut in the yard, from which remote and rugged that no one has sprung a tree. It was the fate of Abraham Lincoln to be grievously misjudged. The impression hat he was an illiterate, boorish frontiersman, given to rough jokes, was one widely disseminated by the opponents o the political movement of which he was the leader, and it died slowly even after he had given ample proof of the greatness of his qualities. The world was gradually coming to a juster appreciation of the man when the assassin's bullet which clouds which still obscured his commanding figure and revealed him for what he was: one of the world's heroes who helongs not to a country or to a time, but | ccuntry." to the whole human race. In two famous publications, Harper's Weekly and London Punch, he was carl-

catured without mercy. The carteons in remains of the emperor had reached the latter were drawn by John Tenniel then, as now, the master draughtsman of Punch; and looked back upon, through the clarifying perspective of over ty-four seamen to its last resting place thirty years they seem singularly point- in the Hotel de Invalides. less. In this issue the noble lines which we reproduce above were published, and no manlier apology was ever made. The poem was written by Tem Taylor, one of the most brilliant members of the staff of Punch. He be-

Passport Regulations. There are few countries in which travelers require passports in order to promote convenience and security.

came the editor of that journal in 1874,

and died in 1850 at the age of 60.-Ed.

In Brazil and Venezuela a passport must be shown to the officials before one is allowed to leave the country for a foreign port. This is a vexatious measure enforced apparently for the sake of enabling a few officials to collect small fees. In Cuba passports are produced whenever traselers arrive or depart. This precaution is considered necessary in view of the political condition of unrer; prevailing in the

island In Russia passport regulations are enforced with great stringency. No traveler is allowed to enter the empire until he has obtained a passport and convinced the Russian consular officers at the port from which he sails that he is neither a Roman Catholic priest nor a Hebrew. The question

ordinarily asked is: "What is your re-

CAMPFIRE SKETCHES. against the entry of either of these two FARM AND GARDEN.

When the traveler arrives at a Rus-GOOD SHORT STORIES FOR sian port with a passport which has been properly viseed and countersigned at a consular office, it is critically examined by a police officer, and duly

registered.

At the entrance of the hotel another police officer takes possession of the document, and in the course of twenty-four hours returns it with a permit for a limited residence in the country. When the traveler departs for another city in the empire he must have the passport countersigned by the police. This process continues until he reaches the frontier, which he cannot cross unless the passport has been viseed and stamped by the police. Not infrequently tourists are stopped at the frontier and subjected to serious inconvenience because they have neglected to comply with the police regulations

respecting passports. All this red tape causes annoyance and irritation among tourists, who are apt to overlook the fact that Russians as well as foreigners are compelled to obesrve these police regulations. It is the business of the police to know where everybody lodges. A permit is required if a native removes from one quarter of a town to another. Everybody is registered by the police when Of chief's perplexity or people's painhe arrives or departs, and foreigners when they are in Russia are dealt with on equal terms with permanent resi-

The same system prevails in Turkey, where it is not practicable for a foreigner to travel without a passport. Elsewhere in Europe passports are not period when communications between countries were slow and infrequent. Now that all nations are drawn together by the ties of constant intercourse a passport is out of date except in countries like Russia, Turkey and Cuba, where it fits into the police system of registration.

The inventor ment bodies of military wheelmen can come to a sudden halt and fire on the enemy and reload their rifles without dismounting.

Napoleon's Last Words. On his death bed Napoleon expressed his conviction that England would end

like the proud republic of Venice. With perfect composure, he gave his last directions: "I desire that you will take my heart, put it in spirits of wine and carry it to Parma to my dear Maria Louise; you will tell her that never ceased to love her, and relate to her every particular respecting my death upon this miserable and dreary rcek. You will tell my mother and family that the great Napoleon expired in the most deplorable state, deprived

of everything, abandoned to himself and to his glory, and that he bequeathed with his dying breath to all the reigning families of Europe the horror and opprobrium of his death." The second codicil of his will contained the direction which was afterward complied with: "It is my wish

that my ashes may repose on the banks of the Seine, in the midst of the French people whom I love so well." On the 5th of May, 1821, he who had for years kept all Europe in a state of feverish excitement, terminated his earthly career.

After lying in state two days, the body was deposited in a coffin composed first of tin lined with white satin, which having been soldered, was enclosed in another of mahogany, a third of lead, and the whole in a fourth of maghogany secured with iron screws. After the ceremony, an enormous stone was lowered over the body, resting on a stone wall so as to escape the coffin.

On the 12th of May Louis-Philippe commanded that the ashes of Napoleon be conveyed to France. In his communication he said: "Henceforth laid him low, swept away the lingering France, alone, will possess all that remains of Napoleon; his tomb, like his fame, will belong to none but his

His Best. In the life of Whittier it is told how in the days of the civil war, an old Quaker, from the New Hampshire hills, came down for an interview with the good poet. This Green Mountain disciple of Fox was the owner of a sturdy lot of oak trees. The govern-

ment had set its eye upon them and wanted to buy them. The Quaker knew that the purpose of the bargain must be to get timber for the new warships that were building. He hardly knew whether a sale for such a purpose was consistent with the gospel of peace.

Whittier, either seeing that the man's mind was pretty thoroughly made up to the bargain, or else considering that there was such a thing as pushing a good creed too far, would "Well, friend, if thee dost sell any

timber to the United States, be sure that it is all sound." The oak from the Quaker's farm was in the Kearsarge when she fought the

MATTERS OF INTEREST TO AGRICULTURISTS.

Jome Up-to-Date Hints About Cultivation of the Soil and Yields Thereof-Horticulture, Viticulture and Flori-

> Soil Inoculation. HE Alabama expe-

riment station has been making some experiments in inoculating the soil with tubercles that of the leguminous plants. A full report is given in bulletin 87. The

summary is as fol-Cow peas, clovers, vetches and other plants, known as leguminous plants or egumes, when plowed under enrich the soil by adding nitrogen, a large proportion of which they have obtain-

tained from the atmosphere. The enlargements or tubercles on the roots are the means by which the free nitrogen of the air is made available to leguminous plants. If these tubercles are wanting on a leguminous plant, the nitrogen of the air is unavailable to that plant, just as it is to cotton, grass, and all other higher plants that are not leguminous.

On some soils these normal tubercles do not develop on the roots of such legumes as have never before been grown in that locality. The growth of tubercles can be induced by adding ceris called inoculation.

In Alabama the cow pea is the most generally satisfactory renovating plant for summer growth. There is also need for winter growing leguminous plants, such as hairy vetch and crimson clover, to occupy the land in winter be- farms where mixed farming is practween two sale crops, in order to de- | ticed. A few cows can be made to pay crease washing and leaching of the handsomely on any ordinary farm and soil and to add vegetable matter rich | besides will afford one of the rarest in nitrogen.

Hairy vetch, without fertilizer, yielded on a field where this plant had been repeatedly grown 17,765 pounds of green forage, or 4,174 pounds of hay per acre.

On a field where hairy vetch had never before been grown and where the fertilizer applied contained phosphoric acid and potash, but no nitrofield, the yield of hay was 2,540 pounds, an increase of 995 per cent following a treatment which cost nothing except a small amount of labor. On the inoculated plot the plants were well supplied with tubercles, while on the plot not treated the plants were bare of tubercles.

A germ fertilizer, intended to make available the free nitrogen of the air by inducing the growth of tubercles on legumes grown in soils not already stocked with the proper forms of germ life, was purchased in Germany and used in Auburn in pot experiments with hairy vetch, Canada field peas and Inoculation with this germ fertilizer

or nitrogen greatly increased the yields with untreated plants. This increase in the weight of in-

ing, was as follows: Hairy vetch, increased by 89 per Canada field peas, increased by 138

per cent. Crimson clover (young plants), increased by 146 per cent. Lupins (tested on only one soil), not increased.

Germ fertilizer prepared for vetch, was effective on Canada field peas. Inoculation material procured with- danger. Some doctors say that an apout cash outlay acted like nitrogen, ple at bedtime produces sleep, says and greatly increased the yields of hairy vetch and alfalfa. Soil from a field where a given le-

plants not inoculated was 38 per cent,

More About the San Jose Scale. Bulletin 86, Alabama Experiment Station: In the inspection of various when you buy your tickets. Hotels nurseries made in Alabama this spring | will give rates of \$1 and \$1.50 per day. several facts of interest regarding this | Some prominent fruit growers of other est were noted. In nurseries where states will be present. A good pro all stock was kept moving every three gramme is in preparation, and you canyears, there were no cases of evident infestation among the nursery trees. Although on some of these places apple trees in old orchards and the old wood of pear grafting stock over five years of age, bore the San Jose scale. 1 was told by experienced nurserymen that it would be entirely practicable to move also all blocks of grafting stock every three years. On the places above mentioned this plan will be followed, and the orchards removed entire. All of which will practically preclude the possibility of the San Jose or any other scale gaining a foothold in these nurseries. Acting on my advice all the nurserymen visited (and most of the larger nurseries in the state were inspected) have undertaken thorough methods of fumigation. Thus, while the first move will protect the nurserymen the fumigating will still

further protect purchasers of stock. Food Plants Other Than Fruit Trees. -The question is often asked as to what trees other than the fruit trees, the San Jose scale will attack. Webster, in Ohio, has found it on Basswood or Linden, Sumac, Elm, Walnut, Willow, several Poplars. Catalpa, Chestnut, Osage, Orange and Snowball. cosmopolitan varieties. A specimen of Cotoneaster, coming If ventilators are put on the barn. from a Long Island nursery and sent

to be very badly infested. Varieties of Fruits Possessing Im- stock.

munity.-Inquiries have frequently come to me as to whether there were any varieties of the various fruits possessing immunity from the attacks of this pest. I have heard of but one, and that was reported by Webster. He says: "The Early Richmond Cherry I been killed by the scale, yet the cherry was uninfested; and in two cases that came under my observation, where this variety of cherry had been grafted upon mahaleb stock, and shoots had sprung up from below the graft, the shoots were badly infested with scale.

the trees themselves. Who Should Engage in Dairying. There is a great deal of reckless and

extravagant advice given in regard to the advantages of dairying over other phases of agricultural production, says a writer in Southern Farm Gazette. While good profits are being made by many dairymen it remains a fact that a great deal of the dairying practiced does not pay as well as some other lines of work might. Where a man lives near a good market and possesses the ability to properly manage a dairy we know of no business that offers more pleasant or profitable work; but few men are fitted for dairy work and not many women are likely to fancy the drudgery and attention required to operate a dairy successfully. The man who engages in the dairy business and expects to make a living out of it without work is almost certain to be disappointed. With good facilities, careful and constant attention and a special fitness for the business a fair profit may be expected. On tain germs to the soil, a process which | the other hand while some are sure to make a success of it under the most adverse conditions others will as certainly fail under the most favorable circumstances. Where dairying can be made most profitable and where it should be most encouraged is on the but greatest luxuries, good milk and butter for family use.

Long Island Cranberries. The cranberry growers of the eastern end of Long Island are now harvesting the crop of 1897, which promises to be an unusually large one. The berries are also very fine, being large and sound and have an excellent flavor. gen, the yield was only 235 pounds of | This section of the island has quite a hay per acre; on an adjoining and sim- number of marshes, most all of them ilar plot, the seed for which were in- being under constant cultivation and oculated with earth from an old vetch | growing large quantities of berries. Long Island cranberries always find a ready market and at a good figure. The price paid this year will undoubtedly be at least \$3 per bushel. A cranberry marsh needs little or no fertilizer, the the marsh is flooded with water at the right time and drawn off with equal precision. In consequence of this there is very little labor and less still of capital needed in conducting a cranberry marsh after the ground is prepared, the plants set out, and the marsh is in growing condition. This, of weeks or two months the owner is busy looking after his crop. The largest claims that by the use of his attach- of all of these plants as compared cranberry grower on the island is Sylvester N. Woodhull of Riverhead. About twelve years ago he prepared oculated plants, after thorough dry- twenty-five acres of seemingly valueless low land as a cranberry field and it now yields as great a profit as any equal acreage in Suffolk county. This year Mr. Woodhull will spend about

Deafness Cannot Be Cured by local applications as they cannot other typewriter ever had, because it is the best. Send for catalogue, 1710 There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed conditien of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result, and unless the inflammation car, be taken out and this tute restored to its normal condition, hearing will be destroyed forever; nine cases cut of ten are caused by catarrh, which is nothing but an inflamed not the same that the small crawls on. condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarra) that cannot be cured by Hall's Catarra Cure. Send for circulars, free. F. J. CHENEY & CO., Toledo O.
