This is the second time he has been heard in Columbus, and both times by audiences who were delighted with his talks, although in different veins of

-Principle, pluck, push, industry and pegging away accomplish all that is worth accomplishing in this world, and there are no men but can bring these forces to bear on their individual problems of life, because, in some shape, all our trials, our work, our duties, are problems for us to solve. We can call others to our aid to help us, but our difficulties are mainly our own; our temptations are peculiarly our own; our triumphs, too, are necessarily of the same strength that belongs to the actual nature of things. The industry which plods is at last the brilliancy which

-Hon. Benjamin Butterworth, who made one of the great speeches of the McKinley campaign in this city, died at Thomasville, Georgia, Sunday afternoon at 3:15. He went there to recuperate from an attack of pneumonia and recovered rapidly till two weeks ago, when he suffered from uremic convulsions. Mr Butterworth was of Quaker ancestry, and was a fine man. He was a major in the war of the rebellion, and was a commissioner of patents for Garfield, Arthur and McKinley. He had served five terms in congress and one term in the state

-Concerning the suicide of Willard Baker of Albion, mentioned in last week's JOURNAL, the Albion News says: "That the act was done on a momentary impulse and not premeditated was evident when all his acts are considered. His last words to the writer in the post office were in his usual tones, he passed out quietly, went across the street to the bank, sorted the mail and committed the act, yet not more than five minutes elapsed from the time he left the post office till found by Mr. Blatter. Mr. has been engaged in business here since York, for barial."

Besides rotation, resolution and mo tion in translation accompanying the sun, the planetary bodies have other motions. A fourth motion is that of perturbation. When the orbs pass each other they are attracted and move toward each other, then away, the lighter one moving the most. This is the way the orbe are weighed, and with the volume is calculated the mass of the orb.

A fifth and sixth motion is that of

FOR THE JOURNAL.

acceleration and retardation. As one orb nears another the one approaching has its motion accelerated, and the other has its motion retarded. After they pass this is reversed, and one equals the other A seventh motion is that of a gravitation motion. As our globe increases in size from meteoric showers and other sources, the mass of the earth increase and causes a motion toward the sun, decreasing the length of the year. But during the period of decreasing of the William E. Walton of Maryland was size of the globe as during a great summer when evaporation lowers the height of our great lakes as well as our ocean areas, etc., then the mass of the globe moon as well as other orbs.

An eighth motion is a change in the axis of the earth's rotation. It is a law f motion that bodies will rotate upon their lesser axis, and when, by any means, this changes, the axis of rotation must Indiana, where he had been since before change. An increase or decrease in the ice cap upon the poles of the globe; or denudation of land surface by icebergs van and Miss Maud Parker went to Lin- (that always form upon the land, and slide off, and float large masses to distant areas) has an influence to change the axis of rotation.

which women by weakness or derangement in the organs of menstruation.

Nearly always when a woman is not well these organs are affected. But when they are strong and healthy a woman is very seldom sick.

## ME ELREEY

Is nature's provision for the regulation of the menstrual function It cures all "female troubles." It is equally effective for the girl in her teens, the young wife with domestic and maternal cares, and the woman approaching the period known as the "Change of Life." They all need it. They are all benefitted by it.
