Deputy Becher of the county treasurer's office informs THE JOURNAL that delinquent taxes are being paid up pretty rapidly. That is well. Our Neighbors. Osceola Record: Anthrax, or black leg as it is commonly known, seems to be epidemic in the state. Not only in this locality but from a good many other places reports come of cattle dying from this dread disease. Out of a herd of 160 J. H. Macey has lost two, and J. L. Makeover has had thirteen die in his bunch of over 300. Both gentlemen have wisely concluded to have their herds vaccinated and thus stop any further fatalities.

David City Press: Sheriff Ben was called over in the bluffs Sunday night about midnight to look after a gang of tramps who had taken possession of a school house and refused to get out. The buns had been holding a revelry there for several nights and had terrorized the neighborhood. They were big, burly fellows, but, after sizing up Sheriff Ben, made no resistance. As no one would appear against them, the sheriff did not deem it advisable to lock them up, and thereby cause unnecessary expense to the county, but told them to "git," and they "git."

Fremont Tribune: A man named John Lee, living north of this city, brought in a beaver today that he trapped by the Elkhorn. It is one of the largest beavers seen in this section of the country for some time, measuring about four feet from tip to tip. The animal was very poor when caught but it weighed about fifty pounds. It is safe to say that it would tip the scales at eighty pounds if it had been in good condition. It was evidently an old-timer, and had lost a fore foot, probably the result of previous acquaintance with traps. Lee also brought in a big other day, trapping it at about the same place.

Genoa Leader: Prof. Lord tendered his resignation to the school board the last of the week, but the parents of the coming graduates subscribed \$3 per month and the board raised his salary \$5 per month in consideration of which he consented to remain the balance of the year. Our Genoa gold miners have been exhibiting some rich looking specimens of quartz, this week, which is claimed was taken from their Colorado gold mine. The Leader hopes they have struck it rich out there, but have been skeptical in regard to gold mine investments ever since '92 when a piece of yellow looking quartz induced some friends of ours to invest several thousand dollars in gold mine stock. It is still invested.
