About half the men get married because they're able to support a wife and half because they're not.

Merit Means Money Made.

You cannot advertise money out of peo-ple's pocket all the time; you may do it now and then, but if you don't give them something of absolute merit in return, advertising will never prove successful. The kind of advertising that pays is advertising a good thing. As it has merit the people will use it again and again. Never has this been better illustrated than in the great success of the Cascarets, candy ca-thartic, that we have been lately advertising in this paper. All druggists call Cas-carets, repeaters, that is, people buy them, like them, and buy them again and recom-mend them to their friends. Cascarets are guaranteed to cure constipation or money refunded, and are a delightful laxative and liver stimulant; the best medicine ever made. We recommend all our readers to try thery.

Moonshine has been found to have a marked effect on stammering.

To Cure Coastipation Forever. Take Cascarets Candy Cathartic. 10c or Ec. If C. C. C. fail to cure, druggists refund moncy.

Compared with warm as it leaves the separator. At this time I think it necessary to add some substitute for the butter fat found in the skimmed milk, and for this purpose I use old process oil meal, scalded to a jelly, and mixed with milk. There is soon developed an appetite for grain, and while they will consume at first a very small quantity, it must be remembered that this small amount does the calf just as much good as a propor tionately large amount does a matured animal. I aim to feed all they will eat from our domestic cattle, who ceased of ground oats and wheat bran, mixed equal parts by measure. They also have access to good hay, clover preferred, and a small amount of corn silage as soon as they will eat it. I prefer skimmed milk, oil meal and this grain ration, because they are bone and muscle making foods, and I consider whole milk, containing butter fat worth 20 cents a pound. an extrava-

#### The Delevence

There are now more dairymen in the United States than there ever were before. I mean that among the great mass of men who own cows and manipulate their tests twice a day, there is at present a greater proportion deserv-

ing the name of "dairymen." A man may live on a tract of land cultivating it after a fashion, maintaining cows and imagine himself both a farmer and a dairyman, when by rights he is neither. This term "dairyman" should cease to be applied indiscriminately, as it then becomes too often a misnomer, casting unjust reflections on men who are really what the term implies, says George E. Newell in American Cultivator. A dairyman is a man who knows how to properly breed, rear, care for, feed and milk cows, and also subsequeatly preserve the quality of that milk perfectly till it can be placed in the manufacturer's hands, or manufacture it himself into a first-class product. To do this he must understand cows as a tanner does hides, or a miller grindstones. I often think that a certain adaptability to dairy work is worth more to the individual than anything else. Certain it is that those who find cows and their surroundings distastewhich we are not infallible, and I can ful, will never make money from the only give a method which has brought | business except by selling out. One of to me very satisfactory and flattering the most encouraging signs for an increased improvement in dairy methods calf to remain with the dam only about | in the future is the number of farmers' six hours. This for the reason that the sons who are taking courses of learnearly removal excites less anxiety of ing in our agricultural colleges. Even

should not be encouraged to take it up calves and unless crowded for room for a livelihood. A man's trade or profession makes of mars his life, according as it is suited to his capabilities. And by this rule l see a great many dairymen's lives marred. Let every one who owns or milks a cow strive to be a true dairyman, for only such dairymen can hope to make money out of milk production. Remember that grass only, and not weeds, are needed in the pastures; that cows bred at haphazard are about as likely to turn out profitable as other haphazard arrangements; that milk is now valued by the percentage of butter fat it contains, and that breed and feed control this condition; that many a run-down, almost abandoned farm has been reclaimed and turned into a prosperous dairy place, by dairymen who had learned their trade well, and daily practiced all that they had learned, and that just now while agriculture is the most reliable pursuit in the land, intelligently conducted dairying is the most profitable branch of agriculture.

Sickly all-worn-out women cannot live happy lives. Nearly every woman may be well and happy if she will follow Mrs. Pinkham's advice. See what Mrs. Craig says:

"DEAR MRS. PINKHAM:-- I have taken Lydia E. Pinkham's Vegetable Compound and think it is the best medicine for women in the world. I was so weak and nervous that I thought I could not live from one day to the next. I had prolapsus uteri and leucorrhoea, and thought that I would die. I had dragging pains in my back, burning sensation down to my feet, and so many miserable feelings. Peo-ple said that I looked like a dead woman. Doctors tried to cure me, but failed. I had given up when I heard of the Pinkham medicine. I got a bottle. I did not have much faith in it, but thought I would try it, and it made a new woman of me. I wish I could get every lady in the land to try it, for it did for me what doctors could not do."

-Mrs. SALLIE CRAIG, Baker's Landing, Pa. That Lydia E. Pinkham's Vegetable Compound is a safeguard of woman's health is clearly proven by the ousands of letters constantly being received. Here

is one from Mrs. W. P. VALENTINE, 566 Ferry Ave., Camden, N. J .: "DEAR MRS. PINKHAM:-Before writing to you I felt very bad, had terrible lick headaches, no appetite, gnawing pain in stomach, pain in my back and right nide; was tired and nervous, and so weak I could searcely stand. I was not able to do anything, had sharp pains all through my body. Before I had taken half a bottle of Lydia E. Pinkham's Vegetable Compound, I found myself improving. I continued its use until I had taken four bottles. and felt so well that I did not need to take any more. I am like a new person."
