## IN A NUT-SHELL

To the men of the Iowa, Captain Evans could have paid no higher tribute than when he said: "So long as the enemy showed his flak, they fought like American seamen, but when the flag came down they were as gentle and tender as American women." And this contiment embodies the whole theory of the war on our part. America desires perfect peace, and will have it, even if necessary to make perfect warfare to obtain it.

Cambon Receives Spain's 'Answer to Peace Conditions.

CAME IN SEVEN LONG SECTIONS.

Length of the Answer to Peace Propositions Taken to Menn That Spain May Hazzle on Some of the Conditions. Much Speculation as to Contents of the Message-Some Questions Left Open.

WASHINGTON, Aug. 9.—The reply of the Spanish government to the peace conditions laid down by the United States was received by the French ambassador. M. Cambon, shortly before 3 o'clock vesterday afternoon. The reply came in sections, the dispatch first received giving only the opening passages of the Spanish reply. A few minutes later another dispatch brought a second section and these kept coming uninterruptedly by a procession of messengers until seven sections of the Spanish reply had been received at 10 minutes of 4 when the last part was still to arrive. In the meantime the cipher experts were at work and by 4:30 o'clock they were abreast of all that portion of the reply received up to that time and there was a lull of some time pending the arrival of the concluding portions. It was thought a terrific rainstorm, which swept over Washington about 4 o'clock might have occasioned delay of the

Speculation as to Reply.

Pending the official delivery of the answer speculation was rife as to its contents. There was little or no further doubt that the length of the reply meant that Spain had not given a simple and direct affimative to the American conditions. It was evident 44 that if the reply was an acceptance, it was accompanied by extended discussion and probably by conditions. This caused considerable apprehension in to be conceded—the abandonment of Cuba. Porto Rico and the Ladrones and the establishment of a commission to pass upon questions relating to the Philippines. In the carrying out of this program it was believed that Spain would seek to secure an understanding on many incidental points involved

fied by the Spanish cortes, and it was condition, it was pointed out, exists as to the United States for a peace treaty requires the ratification of the senate to become operative. In case Spain's answer discussed these incidental points there promised to be wide latitude for controversy, and delay unless the president and cabinet declined to enter the field of discussion.

Late in the afternoon the president received an indirect intimation that the Spanish reply had come to the French embassy. A cabinet officer who was with him at this time, said on leaving:

Several Questions Left Open. "The information that has come from Madrid about the action of the Spanish cabinet indicates the Spanish have accepted our terms in a general way, but leaves several questions open that we did not include in the terms submitted. The communication offering those terms was explicit, specifically stating such points as would be left open to further negotiations. We will stand on these

The administration has not yet given serious consideration to the personne of the peace commission, but it can be stated that no one not in accord with the president's present views as to the disposal of the Philippines will be appointed, and McKinley favors keeping at least Manila harbor and sufficient territory around it for its support and protection, if not the whole of Luzon island. As to members of the cabinet as members of the commission, there are precedents for their appointment. notably the treaty of Ghent.

The concluding portion of the Spanish reply was received during the evening but it was not until a late hour that it was deciphered as a whole and gone over by the ambassador. No effort was made to communicate it to the United States government last night beyond a note to Secretary Day advising him that the document had been received but not disclosing its contents. There is complete reticence in all quarters as to the text of the reply, but there is reason to believe it is not an unqualified acceptance of the American terms, but OSHKOSH, Aug. 9.—The striking wood- is framed on the theory of accepting the workers here were deprived of a leader essentials and trusting to a hoped-for over Sanday on account of a clever coup conciliatory spirit on the part of this dences. > Wrecking Expedition Sails. NORFOLK, Va., Aug. 9.—The third Merritt-Chapman wrecking expedition left here vesterday for Santiago. It consisted of the steamer Plymouth, with complete wrecking outfit; the schooner barge F. R. Sharp, with three complete outfits; the wrecking steamer W. E. Chapman, carrying 40 wreckers, Captain Charles L. Nelson, and towing four immense pontoons, two being 100 feet long, 16 feet wide and 13 feet deep, and two 60 feet long, 13 feet wide and 12 feet deep. The four combined have a lifting capacity of about 3,200 tons. This is believed to be the largest wrecking expedition that ever left the United States. The voyage will probably take 10 days or two weeks.

BIG BLAZE AT BISMARCK.

Fire Destroys the Best Portion of the City In a Short Time. BISMARCK, N. D., Aug. 9.-Fire de stroyed the best portion of the city of Bismarck last evening, licking up hundreds of thousands of dollars worth of property. The flames originated in the agent's office of the Northern Pacific depot. Almost before they were discovered the entire building and the immense warehouse of the company were in flames. Oils and powder contributed fuel and before the flames could be checked they had spread to the block of brick buildings across the alley, destroying the Tribune office. Hare's hardware store and an entire row of buildings. The flames then leaped the street to the magnificent First National bank building, which melted away in a few minutes. The Central block followed and the flames spread to the postoffice, sweep ing over the entire block and carrying down the postoffice, Merchants' bank block Griffin block and all the internediate frame and brick structures.

The fire then spread across and de voured Kupitz store and the greater part of the block. The flames also spread north into a residence block and completely destroyed it. Firemen were powerless to check the inroads of the fire, which spread to scores of buildings, licking them up as so much waste paper. The origin of the fire is unknown, as no one was in the freight office when it
