gether Again. Saturday last, a goodly number of the peers and old settlers ate dinner and upper at Maennerchor hall, and enjoyed themselves in meeting and greeting and conversing with old friends and neigh bors, the only regret being that there were not more of them present.

The hall had been appropriately decorated for the occasion with the national colors an ox-yoke being a conspicuou reminder of those early days. At 2 o'clock John Tannahill, president

One day he was in Columbus, and happened to meet E. J. Baker, who convinced him that he ought to have a corn-planter (he hadn't yet broke any sod) at \$65. In about a year, he got the California fever, but staved there only a few months. He came back here, and all he had left was four patches on his pants. He worked at whatever he could find to do, saved his money as best he could, investing it in business, as

He referred in a sarcastic way to good old times of 1857-'8, of the "wildcat banks," etc. He drew a comparison between the east and the west in those days; in the east a man could scarcely get employment, working for board only, and in the west everybody was busy and wages good. At Col. John Rickly's, where he first worked, he got \$40 a month. He took up a homestead on Stearns prairie, where the settlement was so sparse that the school district was fourteen miles long and seven miles wide. A greeny hardly ever learns everything in one lesson, and the first melon he bought to eat he prepared his feast by scraping out the whole inside. Mr. Hudson entered heartily into the spirit of the occasion, and was perceptibly affected when he touched upon the intimate relations of the pioneers, in those times when the country was totally different from now: the day of Indians and Pilgrims. Rev. Goodale said that in the build ing of a community, as of a house, it was all important that there be a good foundation, laid by the square and the plummet. Pay Dirt. We hear that a party from the east is 1.48 here looking after a tract of land that seems to contain dirt of a high order. For some time this dirt has been used 2.48 for cleaning silverware-in fact is a splendid polish for most any kind of goods. It now pans out that a test of the dirt shows it to contain properties of a high order. A sample of 300 pounds was sent east Tuesday where it will .68 again be tested as earth paint. The 1.24 first batch sent proved to be all right 1.98 for paint purposes and the factory now .98 desires to test it in large quantities-2.48 hence the quantity sent. We did not 3.25 learn on whose land the stuff is found
