

The new stables of the emperor of Germany are to cost about \$2,000,000, and will accommodate 270 horses and 200 vehicles. There will also be lodging rooms for fifty married grooms and coachmen and their families, and for eighty single hostlers and other servants. Two riding and racing courses, both under cover, will also be built. Automobile watering carts are in use in Paris.

Luther said that if a man were not strong at 20, handsome at 30, learned at 40 and rich at 50, he never would be strong, handsome, learned or rich.

### "One Year's Seeding," Nine Years' Weeding."

Deflected impurities in your blood will seed disease of which you may never get rid. If your blood is even the least bit impure, do delay. In so doing there is safety; in delay there is danger. Be sure to get only Hood's, because

Doctor—Have you taken any remedy for this trouble? Patient—No, doctor, I have not; but I have taken a power of medicine.—Harlem Life.

STATE OF OHIO, CITY OF TOLEDO, ss. I, Frank J. Cheney, declare that I am the senior partner of the firm of F. J. Cheney & Co., proprietors of the well-known Sarsaparilla, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every cure of Catarrh of the Kidney cured by the use of Hood's Sarsaparilla.

Sworn to before me and subscribed in my presence, this 15th day of January, 1900.

A. W. GLEASON, Notary Public.

Hood's Sarsaparilla is taken internally, and acts directly on the blood and kidneys, free of the system. See testimonials, free. Sold by Druggists. F. J. CHENEY & CO., Toledo, O. Hood's Family Pills are the best.

The intimacy between Senators Chandler and Gallinger, of New Hampshire, was caused by a dispute regarding a postoffice appointment.

Ask Your Dealer for Allen's Foot-Powder. A powder to shake in your shoes. It cures the feet, cures corns, Bunions, Swollen, Sore, Hot, Galled, Aching, Sweating Feet and Improving Nails. At all druggists and shoe stores, 25 cents. Sample mailed FREE. Write Allen, 25 Allen St., Olinsted, Le Roy, N. Y.

Vegetables are like fresh air—indispensable for our health; they cool and purify the blood and add a necessary acid to it.

Work for All. Thousands of men are making good wages in the harvest fields of Minnesota, North and South Dakota. There is room for thousands more. Half rates via the Great Northern Ry. from St. Paul. Write Max Hays, 229 South Clark Street, Chicago.

The Chinese tale is a coin which has never existed. It is simply a unit used for convenience.

Faultless Starch. There are many starches on the market but only one "Faultless." All grocers sell it. Every good housekeeper uses it. Try it and be convinced. Large package free.

Out of clothes out of countenance. Out of countenance out of wit.—Ben Jonson.

U. S. Patent Office Bureau. G. A. Carpenter, of Fort Morgan, Colo., has been allowed a patent for a fly exterminator. A frame made of a single piece of wire and the ends of the wire twisted together and extended at an angle is covered with bibulous paper and the extensive insect is the top of a bottle in such a manner that the frame will be retained in a horizontal position and poisonous liquid will be carried around the insect, keeping paper moist and flies taking the liquid will die.

C. F. Nelson, of Exira, Ia., has been allowed a patent for a boot and shoe cleaner adapted to be fixed to a door step in such a manner that the bottoms and shoes on the feet of wearers can be advantageously scraped and cleaned thereby. Flexible material fixed to the metal parts and scrapers or dampers the leather.

We do all the work required in preparing drawings, specifications, and claims and filing and prosecuting applications for patents for inventions. Correspondence solicited and advice free. THOMAS G. GUNWIG & CO., Solicitors of Patents.

Des Moines, Ia., Aug. 5, '99.

The truths we least desire to hear are those which it would be to our advantage to know.

Mrs. Winslow's Sorefooting Syrup. For chapped, cracked, sore, red, itchy, swollen, aching, and burning feet. Reduces the inflammation, cures the disease, and restores the feet to their normal condition. Sold by all druggists.

Probably nothing grows so monotonous as having a collector come around with the same old bill every month.

Does your liver ache? Pain back of your ribs? Bad breath? Headache? It's your liver! Ayer's Pills are liver pills. They cure constipation, headache, dyspepsia, and all liver complaints. 25c. All druggists.

What you need is a good skin. A beautiful complexion is the result of a healthy skin. Use BUCKINGHAM'S DYE FOR THE SKIN. It is the best skin dye ever made. Sold by all druggists.

TOWER'S FISH BRAND POMMEL SLICKER. Keeps both skin and scalp perfectly dry in the hardest weather. Substitutes for soap. Cleanses the skin. Removes dandruff. Prevents itching. Refreshes the hair. Write for catalogue to A. J. TOWER, Boston, Mass.

## CAMPFIRE SKETCHES.

### GOOD SHORT STORIES FOR THE VETERANS.

The Old Soldier's Story—The Confederate Lieutenant Filled the Trigger That Ended His Own Life—A Novel Name—How She Conquered the German.

There's a breathless hush in the close night.

Ten to make and the match to light. A bumping pitch and a light. An hour to play and the last man in. And it's not for the sake of a ribboned coat.

Or the selfish hope of a season's fame, But his captain's hand on his shoulder "Play up! play up! and play the game!"

The sand of the desert is golden red—Red with the wreck of a square that broke—The jangling of arms and the Colonel dead.

And the regiment blind with dust and smoke, The river of death has brimmed his banks, And England's far, and Honor's a name, But the voice of a schoolboy rallies the rank.

"Play up! play up! and play the game!" This is the word that year by year, While in her place the school is set, Every one of her sons must hear.

And none that hears it dare forget. This they all with a joyful mind Bear through the smoke of battle, And falling find to the host behind—"Play up! play up! and play the game!"—From Oswald.

The Old Soldier's Story. "I do not get a pension," said the veteran, who had trotted his first head at Bull Run, breaking into a wild gallop before he passed under the wire gate at Washington, and finally stopped to tire from the turf at Appomattox, "nor do I want one, though I suppose if I were not in comfortable circumstances I might try for it; and still I had about as much of the scrap as anybody I know of, for I began early and quit late. Luck with some people, though, for I came out without a scratch, and I didn't lose a day on account of sickness. But I am lying the track. I think you said you wanted that story about the man who killed himself trying to kill me.

"It was one of those innumerable small fights that were happening in Virginia all the year round, and was so little that it did not even get a name. I was in an infantry regiment, and a detachment of 150 of us had been sent to the front of the skirmish line to feel around and see who we might find, that we did not want to find, namely, some part of the enemy's advance. In a clump of trees we found it in the shape of a hundred or so cavalrymen, wearing the gray uniform we had seen at the front of that neighborhood. It meant business, of course, and in a very few minutes there was a mixing of contending forces which was, to say the least of it, extremely demoralizing.

The troop of cavalry was composed of head-headed young Southerners who had not any thing but rushing right into the middle of us, yelling and swinging their sabres around their heads as if they were riding in a tournament at one of their county fairs. They seemed to be utterly regardless of our feelings, too, and before we could get out of half a dozen of our boys were cutting up the rest of us like a lot of young butchers out for a picnic. At the same time we were not entirely idle or neglectful of such opportunities as might be presented, and I may say that the general idea of the meeting, to the eye of the casual observer, was real 'hot stuff,' if I may use a bit of modern language.

"I had had very little experience in military affairs of any kind, and up to that time I had been the only little rattle in which I had taken an interest, but the activity on that occasion had not having been of the kind, you may remember, which gives a soldier a wide experience in fighting, notwithstanding that I had some experience in conducting a retreat to the rear, and how we did run that day. It was now we were to think about it even now, and the veteran smiled at the thought and puffed mildly in reminiscence of his run.

"As I was saying, being inexperienced in fighting, I didn't know just what to do, as is the way with most new soldiers, so I kind of ducked down my head and went into it on the blind luck, trusting in providence and keeping my powder dry. In such a scramble, indeed, and so hot, that I was going on or how best to do the thing, he has to do. It is slap, bang, and roar, slash, jab—a rush and roar, a throatful of nasty sulphur smoke, possibly a bee stinging in body or limb, a fall in the leaves of dust or mud, a sense of something one scarcely knew what, and the end has come, either to the fight or to the fighter. I had reached the slap and the bang period and was feeling pretty good, seeing that I had killed a man or two over and hadn't been knocked over myself, and was getting into the spirit of it, when a fellow when I found myself hand to hand, or musket to sabre, with a young lieutenant about my own age and build. He came straight at me, cutting with intent to kill, and I tried to shoot him off his horse, for I had somehow got a load in my musket and was ready for that kind of business, but he was so close that shooting was out of the question, and I could only use my gun as a guard to keep the fellow off the fence on my side, and I was not strong enough to swing around so I could shoot, but he saw what I was after and kept it so hot for me that I did not dare to take away my guard long enough to use it on him instead of on myself. I put up the best defense I could, trying to punch him with my bayonet, but the young fellow evidently had some military training, in sword exercise at least, for he knocked my gun around pretty much as he pleased. Indeed, he had such success that he was wearing me out fast, and I felt that if something didn't happen for my side very soon there would be one more bluecoat grave to dig on the morrow. He saw his advantage, too, and with a yell he came again, swinging that big sabre of his so high and strong that it seemed to me to be the sword of Michael or of some other of those picture people I remembered to have seen in my books, and I made up my mind to give him one more poke with my bayonet for luck before he took him by the neck if he wanted it. But he would not give me a chance to do even this much. He banged that confounded sword around my head until I could only hold my gun up and try to save my face so that my friends would have something to identify me by after the battle was over. He rained his blows so thick that I weakened fast and just as I began to sink from exhaustion he reached around with a terrific blow to settle me once for all. I had sunk down half to my knees when the musket fallen forward, and he let the sword fall it struck the barrel of the gun instead of the barrel and with a crack that I could distinguish in all the row and the rumpus.

## FARM AND GARDEN.

### MATTERS OF INTEREST TO AGRICULTURISTS.

Some Up-to-Date Hints About Cultivation of the Soil and Yields Thereof—Horticulture, Viticulture and Floriculture.

Brown Potato Rot. B. T. Galloway: This disease occurs in many parts of the South, and in addition to attacking the potato, it is found to seriously injure eggplants and tomatoes. In the case of the potato, the leaves, stems, and tubers are affected. The disease usually manifests itself by a sudden wilting of the foliage and a decay of the tubers. It is caused by a fungus, the spores of which are blown about by the wind and settle on the plants. The disease reaches the tubers through the stems, producing a brown or black discoloration of the tubers and ultimately a complete rotting of the tubers. The disease is caused by a fungus, the spores of which are blown about by the wind and settle on the plants. Brown rot is caused by a bacillus, a minute organism, which multiplies in the tissues and through its action produces the effects mentioned.

The future usefulness of the colt depends upon nothing so much as the feed during the first year of its life, says Rural World. To be useful in any way a horse must have good bones, and above all, good joints. Bones are built, like the rest of the body, from the feed consumed by the young, and the quality of the feed is of great importance. The colt must be fed on a diet of good hay and grain, and the quality of the feed is of great importance. The colt must be fed on a diet of good hay and grain, and the quality of the feed is of great importance.

The small white varieties of beans are the most easily raised and most prolific, ripening better and harder. They bear distant shipping or long voyages better than the narrow or round varieties, and are much higher in market. The navy beans average twenty bushels per acre; all kinds vary in production according to the season. The narrow are considered by some the most desirable.

The small white varieties of beans are the most easily raised and most prolific, ripening better and harder.
