LONDON, Oct. 21 .- A Glencoe correspondent telegraphing yesterday "A force of 6,000 Boers, led by Com-

mandant Genral Joubrt, has been beaten severely by a force under General Symons and the enemy at this moment are in full retreat. "At 7:30 General Symons ordered a general advance of the infantry brigade, which he himself accompanied. The Dublin Fustleers were well in front with the King's Royal Rifles out on the front and the Leicestershire regiment on the left. The men advanced smartly, taking advantage of every bit of cover-tactics in which they had been exercised for weeks

By the time the Fusileers and the Royal Rifles got within 1,000 yards of the crest, the Boer batteries were completely silenced, our batteries having pounded them at 2,500 yards range with crushing effect. The Boers meantime were keeping up a heavy rifle fire, which thinned our

ranks considerably. "By 9 o'clock the Fusileers and Royal Rifles had swarmed over the hill and the Boers were on the run. Meantime the Eighteenth Hussars and the Leicestershire regiment had moved north and east, thus practically cutting off the Boer main line of retreat, and the enemy, caught between two fires, lost heavily. At this moment fighting is still going on, but the defeat of the enemy is already complete and crushing and it looks as though few would escape. "Our losses are probably 300 killed

SAN FRANCISCO, Oct. 21.-The Chronicle says: There is little cause for alarm at present over the fact that possibly the United States transport Senator, with the lowa troops aboard, encounterede a typhoon shortly after leaving Yokohama, according to marine men and owners of the steamer. The fact that the Empress of India did not sight the transport and was herself caught in the typhoon is not regarded as omnious for the Senator. In the petition filed by Attorney Morsman he sets out the history of the case. Nebraska Stockmen Buying Sheep. SOUTH OMAHA, Oct. 19.-The Dener Stockman has this to say of sheep feeding conditions in Nebraska: "The big Nebraska feeders are getting down to business. They have concluded that prices on southern lambs are not too high when the cheap corn is consid ered. They are going after the lambs now and buying them by train loads. for the heavy buying going on now not only in the south, but in the west as well. The beef supply available next spring does not figure out as going to be as great as the demand, consequently there is a great likelihood that beef will be high. To counteract this high market and to supply such consumers as will not find themselves able to buy the high-priced beef all the time there is a strong possibility that much mutton will be consumed, and these sheep buyers are getting

ready for such demand. "The latest purchase of forty carloads of New Mexico lambs and yearling wethers by a big Nebraska feeder at a cost of \$2.30 per head at point of loading is a price that cannot help but render a handsome profit when marketing time comes."
