come up, while he himself, with a

bandful of men, hastened along a well-

worn footpath in the direction of the

music. Presently they came upon a

rude cabin, half-concealed by the thick

foliage of the surrounding trees. A lad was making merry before the open

areplace, and intent upon his playing,

did not note the arrival of the soldiers

till the officer rapped smartly upon

consciously kept step to the music.

Upon the horse and man, pell-mell-

the boy had offered his services, the father consenting, glad of heart that he too might thus assist his country. Down the winding path the men hurried, the old trapper whispering a few last words to his son, the while striving to keep back the great lump in his throat that threatened to choke him. It was nearly ten o'clock when the little column of men, headed by the

young fifer, moved away, marching to A poem entitled Guerrilla written the tune they had first heard. Little luring the Civil War by Dr. John Wil- by little the time was quickened till the men were following at a double-quick march. The lieutenant suggested tory. The manuscript was given to that the men ask from time to time for a friend shortly after it was written, familiar songs, and from one to another the musician glided, ever playing

newspapers, but Dr. Palmer did not at the lively tempo of the first. Toward morning the men noticed that the fifer made an occasional slip. The notes were not so clear, though the time never lagged. Later the musician made a bad break, and some of months ago the writer of this note the soldiers laughed. The fifer said nothing; he kept on, but the mistakes grew more frequent and noticeable. Morning had begun to break, and presently the soldiers saw in the distance the white tents of the Union poems, among which was Guerrilla. army. The young musician was These were shown to Dr. Palmer by a playing-no, trying to play-"America" mutual friend, to whom he stated that for the tenth time, as they marched he was the author of Guerrilla.-Ralph into camp. Far in the rear a body of foot-soldiers had wheeled and retraced their steps, too distant to be successfully pursued. The exhausted men had

narrowly escaped. Two of the men carried the little fifer into a tent and bathed his swollen lips. They then knew why the music had been so broken the past few hours. -Frederick E. Burnham, in Youth's Yankees in camp! Call up the hunt! Companion.

Now for the chase, the charge, the How Chaffee Coached a Coward. It was at El Caney. Several companies were detailed to dig trenches and the Spanish sharpshooters were potting at them from treetops and clumps of bushes on the hillsides. Gasps "Forward!" clutches, reels, goes Presently the firing became so severe that the men were ordered to drop their tools and return it. About this time General Chaffee came along on foot looking over the situation. In the bottom of one of the trenches he saw a soldier lying flat on his mee, while the man next to him kicked him Well, here's the hill and there's the in the intervals of firing.

'What's the matter with that man?" and there the drowsy pickets tramp; asked General Chaffee of the speaker. and I think that the trouble with Mr.

Our brave steeds sniff the smoke and "No, sir," said the soldier, saluting. The prostrate man made no motion. "Sun, then?" asked the General, for there were many cases of collapse from heat under the bitter glare of the Cuban afternoons. "I don't know, sir." replied the sol-

dier in embarrassment. All this time the bullets were whistling around and the soldier had risen from his crouching posture, and was standing at salute.

"Don't stand there and expose yourself, my man," said General Chaffee, kindly, although he himself had been standing in full range all the time. Now he walked over to the groveling soldier, took him by the collar and Elaborate preparations are being hauled him to a sitting posture. made in Chicago for the entertainment

"What do you mean by lying there?" of the Grand Army of the Republic he said sternly. "Get up and fight with during the closing days of August. your company." "No, I can't," whined the fellow.

"Can't," said the General. "Well, surpassing beauty. The general you're a fine soldier! What business scheme of the decorations is to place have you got here? What's the matter a triumphal arch at Van Buren street | with you, anyway?"

"I'm afraid; that's what's the matter and one at Park Row, connected by intervals on both sides of the street, trying to wrest his collar from the forming a colonnade broken only by grasp of the other and trying in vain, the pylons that flank each side of the for General Chaffee has muscles of reviewing stand. The arches will span steel.

"Beg pardon, sir," said the man's colonnade; one will be dedicated to neighbor, saluting again. "I think the the Grand Army and one to the navy. kid's been sick, sir." He twisted his captive about to get

a good look at him, and his face, which

on either side with large four-column pylons decorated on the top with a had grown set and angry, softened at large American eagle in plaster, rest- what he saw. "Now, see here," said he kindly, "You can't help being frightened, I suppose, But there isn't nearly so much danger

as you think there is. You just pick up your gun and take your position and fight and I'll stand here by you till you get used to it." Shaking like a leaf the boy seized his

gun and fired a shot almost straight up in the air. "That's a little high," said his instructor. "Try it lower and take a little more time to aim. There's a Spaniard in that green thicket straight

President Lincoln and his cabinet and in front of you, I think." After three or four shots the young soldier got his nerve, stopped tremgramme to give the old soldiers an op- bling and began to shoot with some portunity for their heartily enjoyed accuracy and judgment.

"That's better," said General Chaffee. come. Special committees will assist as he moved away. "Stay there and do in the pleasant duty of making them your best."

Grant Decided for Himself. During the most critical part of the Late in the fall of '63 there might | war, when everything looked darkest have been seen one evening a small in the North, especially at Washingcompany of Union soldiers, footsore ton, Grant's confidence in his ability and hungry, wearily pressing on to bring victory to our arms never through a forest in Tennessee, intent | wavered for a moment. In fact, so

upon escaping from a pursuing force thoroughly convinced was he that he rarely consulted others as to his Three days previous they had become course of conduct. He seldom called detached from the main body of troops, a council of war, and when he did he and they were now seeking to join would sit and smoke, listening pathe Union forces, camped some forty tiently to the opinions expressed, but miles away. A scout had overtaken only on rare occasions voicing his them the previous night and acquaint- own. After his generals had dised the commanding officer with the cussed various ways of withdrawing the army in case of disaster, he would adjourn the council, and, handing a 60 per cent within the past year. The paper to each officer, would say: "You Spanish war, the Boer war and the the brave boys in blue had made a will proceed at daylight to execute

these orders."-Success.

Australia's Navy. Under federation Australia's navy will doubtless be increased, while recent events have shown that she will take her place in the empire's councils. She, too, will have her standing army. The war in South Africa has awakened the colonies. How the federation of the military units will be accomplished is difficult to say, but that a volunteer movement on a large scale will be started goes without saying. Men from all parts of the colony. even as far as Thursday island, have poured in for active service, so that

OUR RURAL READERS.

(Condensed from Farmers' Review Renographic Report.) At the last Wisconsin Round-up In

stitute the following discussion took

Prof. Smith-The fact is that there no animal odor in milk when it comes from the cow. It is put in by the milker. We have milked cows and opened after twenty-four hours there was no odor about it. It can set for at least ten days and still have no odor.

Mr. Goodrich-I cannot agree with Prof. Smith in his conclusion that there is no animal odor in milk in its pure state as it comes from the cow. A short time ago I heard another professor talk on this subject. He said that there are in the body of every animal certain eliminating organs whose work is to eliminate certain gases and that the udder has some of these from the body and pass them into the

Prof. Farrington-I think there is a difference between aerated and unaerated milk that we do not understand.

Q.-Does aerating milk improve i for cheese making and butter making? in hot weather. Prof. Farrington-Yes, sir. Mr. Noyes-Yes, sir.

Mr. Goodrich-Why doesn't that set-

tle it, then, that cheese factories and

creameries should require patrons to aerate the milk? Q.—Does not aerated milk give better test and a more accurate test? Prof. Farrington-Yes, sir: I think that we would get a better test unless

the person that makes the test is careful to thoroughly mix the milk before taking the sample. Q.-What is the cause of cream but-

tering in the process of being made into ice cream? I supply cream to an ice cream maker in the city, and I have had it butter when it tested 27 per cent

Prof. Farrington-There are two things, either of which may cause it; one is the temperature and the other is the thickness of the cream. Besides that, the cream may be exposed to excessive jarring in transportation.

Mr. Lomar-I have been supplying cream to a restaurant for three years. makes the ice cream. The temperature of the cream is too high at the time it is put into the freezer, and the freezer was run too fast. The beating of the cream produced butter before it | the land must constantly diminish. got down to the freezing point.

Poultry Briefs.

The Bureau of Labor Statistics says that last year 106,988,710 pounds of live and dressed poultry were shipped from the 114 counties of Missouri, This sum is an increase over the preceding year of 36,907,443 pounds. The total number of dozens of eggs shipped last year was 34,875,040, and the aggregate value received by producers of poultry and eggs was \$12,091,048.54.

It is reported that Canada is sending large quantities of poultry to the United States. Last year between 8,-000 and 10,000 live geese were shipped to the feeding yards of one poultryman in Massachusetts. There have been seen at Sabrevois, in the province of Quebec, as many as 11,500 live geese and 5,000 live ducks at one time. and it takes 125 bushels of grain a day Corinthian coumns placed at regular with me," said the soldier, doggedly, to feed them. The firm of S. H. Jones. at Sabrevois, has had at one time as many as 25,000 geese and 15,000 ducks. Some American firms make most of their purchases in the townships of the Province of Quebec, New Brunswick and Prince Edward Island.

Few realize the aggregate value of our poultry industry. Statistics on this point are of very little value. Fowls are kept not only on the more than 4,000,000 farms of the United States, but also by millions of persons residing in the villages and cities. The beauty of this industry is that the smallest capitalist may invest in it, as 25 cents will buy a live hen. With the increasing population of the country poultry meat is certain to take a high place. If the time ever comes when beef, pork and mutton cannot be cheaply produced here, poultry flesh will be in enormous demand. We have formed the meat eating habit and the people will have meat. Our poultry industry is bound to become more important year by year.

Probably there was never a time in the history of this country when greater improvement was being made in people are coming to see that imand grade up the flocks. The fanciers by constantly advertising for years have induced multitudes to come to their way of thinking. That there is money in the business is proof that the people are responding to the agitation for better types of fowls.

Demand for Horses and Mules. According to Tennessee dealers the in great demand and prices have risen passing of the bicycle have tended however, to produce the satisfactory results for the horse people. Tennessee roadsters and saddlers of the fancy kind are readily purchased in New York, while many buyers from the lower Southern States have been in Tennessee making purchases. Some Tennessee horses too have been bought up by British agents for the cavalry service in South Africa. Many good horses have gone there, the buyindividuals, rather small and with plenty of endurance. West Tennessee. just such horses as these. The ship-

Kentucky horse men also being on the lookout for good individuals of cry," and the date 1599. this class, and many having come into this state in search of them.

To the Farmers' Review: My experience with milk fever has not been very extensive. Some twenty years ago was my first. I had a very fine cow at that time known as the Roan Shorthorn. It was in the month of June about 5 o'clock in the evening she gave birth to a very fine calf, and both seemed to be in excellent condition. The next morning about sunrise set the milk at once, and when it was I went out to look after my fine cow, and she was lying down. When I went to drive her up she made several efforts before getting up on her feet, and I cannot describe her actions any better than that she staggered and reeled just the same as a man would when badly intoxicated. She only went a few rods, laid down and never got up again. She died about sunset the same day in the greatest agony. This cow was in good fiesh, in fact too good, as that is the most likely to take it. About six years ago I lost another one with the same organs, which eliminate these gases disease. Her actions were the same, only she lived about two days instead of one. Since that time I have not lost any. In the first place, I endeavor not to let my best milk cows get too fat, as that is the kind most likely to take the ailment. I think, too, that cows are only likely to have milk fever

Milk Fover.

I have found as an almost certain preventative in fever that at least one month before calving put the cow on dry feed, without grain, and diet as the time of calving and several days afterward, and you will be safe in never having milk fever among your cows. The cows giving the greatest flow of milk are the only ones subject to milk fever. A poor milk cow never has it. I have no cure for the milk fever, neither do I have any faith in any one else curing it.-S. C. Judy, Vermilion County, Illinois, .

Sheep as Fertility Conservers. Bulletin 61 of the West Virginia Experiment station says: A large prouse Magnetic Starch. portion of the lambs which are raised in West Virginia for the production of mutton, are marketed in the fall, and although this is undoubtedly the simplest way of disposing of the surplus lambs, yet this practice possesses some serious defects, for when animals of any kind are constantly being sold has always proved itself the "friend shoes easy. Cures swollen, hot sweating, ganism spring from inflammation or from a farm, with now and then some is continually carried away, and unless commercial fertilizers are employed to supply the deficiency of potash and phosphoric acid, the productiveness of On the other hand, if these lambs can be profitably fattened during the winter, they may be made to consume the clover hay, or other coarse fodder of the farm which has only a small commercial value. Also the farmer is enabled to feed his grain at home instead of being obliged to draw it several miles to the railroad station. In addition to the grain which is raised upon the farm, some of the concentrated feeding stuffs, such as cotton seed meal, linseed meal, or wheat bran can generally be used to advantage in the fattening ration, and as each of these materials contains a large quantity of nitrogen, phosphoric acid, and potash, which is recovered in the ma-

ter is intelligently carried out, that Slugged Because He Kicked. the land will gradually become richer John Ford, state senator of New York, gave an interesting account in tility will be added by the manure court of his treatment in the Tivoli. a questionable Tenderloin resort lately raided: "I accused the man of overcharging, and the first thing I knew I had my arms pinioned and I had a sensation as if a 1,000-pound weight had fallen on me. I was thrown to the floor, thumped and rushed out to the sidewalk. I had a cut on the head, the goat carries the same idea to a far one on the ear, my lip was cut, my jaw thumped and a tooth knocked out, both eyes blackened and my arms are still black and blue where I was goats and browsers by nature. They seized. I was not struck until my arms will live and flourish where even a had been pinioned. I assume that it

Hor Dog Collar Belt. Young women frequently wear belts that were manufactured to go around the necks of dogs. They show thus how slender their waists are, a dog being big enough to clasp them. Philosophers can dig out no other reason for this fad. In Philadelphia the other day a young woman wore an engraved dog collar belt which she had borrowed for the time from her father's stiff. The engraving was of a mastiff's head, and around it ran the words: "I am John Brown's dog. Whose dog are you?" Smiles and sneers were handed out to the young woman from those who read the belt and she appeared to be delighted with the attention she was winning.

"It must constantly be borne mind," asserts President Hadley, of Yale, "that the training of the free citizen is not so much a development of certain lines of knowledge as a development of certain essential qualities of character and habits of action. THE BOXERS OF CHINA

are attempting to solve a gigantic problem, but they are going about it in the wrong way and will never succeed. Some people, in this country, seem to think that they have as great a puzzle on their hands in selecting a location for a home. They will certainly go about it in the wrong way unless they inspect the beautiful farming country on the line of the Chicago, Milwaukee & St. Paul Railway in Marinette county, Wisconsin, where the crops are of the best, work plenty, fine markets, excellent climate, pure, soft water; land sold cheap and on long time. Why rent a farm when you can buy one for less than you pay for rent? Address C. E. Rollins, Land Agent, 161 La Salle St., Chicago, Ill.
