## Our 20th Century..

### ..Co-Operative Plan.

The 20th Century demands advance ideas in all business. The old methods must give way to the new—just as the ox-team did to the steam and electric cars. The merchant that charges 25 to 100 per cent profit on his goods because he puts it on the books and may lose a part of it—in fact, loans money to his customers at enormously usurious interest, must give way to the modern idea of small profit, for cash down.

Ten per cent above cost and expenses is a fair return for capital, and we propose to try it.

WE WILL DUPLICATE ANY CATALOG PRICES. WE WANT YOUR TRADE.

## F. H. LAMB & CO.

### NO DOUBT ABOUT IT!

You can buy the best farm implements for the least money at our store. We are headquarters for the most modern field weapons of husbandry in the market. The behind-hand fellow always has a hard time of it. Make farming easy and profitable by using the results of invention we offer at figures on the level.

—As Randolph Durtshak was on his way home from the dance in Bailey's hall on Monday night, or about one o'clock Tuesday morning, when Jake Berlinger's farm a couple of traps called on him to halt and turn over to them what money he had. Randolph had about ten or eleven dollars in his pocket at the time, as he furnished music for the dance and had just been paid off. But about this time Randolph's hair got up on end, when he flew the road into Mr. Berlinger's corn stalk field, followed for some distance by the traps; but they finally gave up the chase and some of Randolph's neighbors say that he is running yet. This is a warning to other young men not to stay out late at dances or with their best girl.—Bellwood Gazette.

—Last Friday Mr. A. G. Gallagher held the attention of the people on the street by the exhibition of the largest beaver ever seen in these parts. The animal was a very fine specimen and weighed fifty-five pounds. Its tail was large enough to have enabled it to hold its own in a "mad" throwing contest with John Porterfield and its teeth must have been capable of falling a tree with comparative ease. It was trapped in the Cedar near the Loop and when found was simply caught by one toe and had undoubtedly drowned itself in attempting to get loose. Several trappers had known of the existence of the beaver and are most likely disappointed that the capture of his lordship did not fall to their lot. The hide was sold upon sight to Dr. Johnson for \$10.—Fullerton News.
