He was a resident of this city some twenty years ago, and very much respected by those who knew him.

With the larger engines, it is noticeable that the Union Pacific company are hauling nearly twice as many cars, at a higher rate of speed than formerly, while the new cars in some instances have double the capacity of the old ones. An Omaha visitor Thursday tells us that the people of the Metropolis are making big preparations for Akarben, and expect a better time than they had last year. Geo. G. Becker and daughter, Lora N., returned Wednesday from their trip east, where they journeyed leisurely, mostly by water, enjoying the trip immensely. They were in Canada, and as far east as New York City, and as far south as Washington City. During the heated term, Geo. says that the capital city is deserted by about half its usual population. Being used, all his life-time, to the large horizons of the prairie country, Geo. remembers now with vividness, the many small farms of the east, with their half dozen cows, a few sheep, a few stacks of grain, etc., but does not wonder, either, that so many people fill the east, because it seems to be a goodly country, and, mostly, people enjoy themselves in the very luxury of living.

J. A. Dowd of North Bend gave us a very pleasant call Wednesday last. He formerly was superintendent of public schools at North Bend, but the last two years has been sojourning in the west, mainly the coast states. At Napa, California, he seems to have found a model climate, a productive soil and congenial people. In California, in a day's travel, can be found a great variety of natural conditions, too numerous to mention, and many of them far too trying for duplicate experience, and certainly those contemplating removal from Nebraska should at least consider well the good and bad qualities of the place they expect to call "home."
