She has lost none of her interest for educational things and has as been a concern in those about her as when she taught in the primary room in the First ward. Her friends hope to celebrate many more birthday anniversaries.  
—The Art department of the Woman's club met with Mrs. Herrick Friday afternoon with a large attendance present. Miss Lora Becker and Vera Kramer and Mrs. Herrick all gave descriptions of the artistic part of the Pan-American, and other members told of interesting items of the Fair. —All that a child wants is a chance to grow and to learn by experience his duties toward the world. Our duty toward him, as wise and enlightened parents, is to be consistently kind and considerate, because he has sensitive feelings, just as we have; to be tender, as he is dependent; to be patient, because he persists of our own faulty nature, and loving, because only in the atmosphere of love can goodness flourish. But, above all, we should be the watchful protectors of his natural rights and privileges because he is little and cannot protect himself.—Florence Hall Winterburn in the November Woman's Home Companion.

—Many people are suffering fearfully from indigestion or dyspepsia, when one single bottle of HERBINE would bring about a prompt and permanent cure. A few doses will do more for a weak stomach than a prolonged course of any other medicine. Price 50 cents. A. Heintz and Pollock & Co.

The cure begins on the first application, a little perseverance makes the cure complete. Price 50 cents in bottles. Tabes, Topeka. A. Heintz and Pollock & Co.  
—Winter coming on apace, all preparations for it are being hurried. The rule of some careful people, "Never undertake to plaster after October 1," has been often, and will yet be ignored this year by scores of Nebraskans. An unfavorable building as the year has been, there have not been summer days enough to complete the improvements wanted.  
—Our information is that George A. Houghton has purchased the lumber plant of John E. Kaufmann, south of Omaha's furniture store, and will shortly make that headquarters for his business here, which has been done under the management of D. Schnepf. The plant consists of a quarter block (two full lots), an office, three good-sized sheds and a stock of lumber.  
—The Catholic church is being painted and Tom Hebe, the masonry painter, as he climbed to the top of the steeple 96 feet high, proved his ability to be "stuck-up" and lock down on common people. When Tom arrived at the gold chain at the top, made of zinc, he found a hole shot through it and the wisp he had taken up their abode inside. A battle with them 100 feet from earth was not a welcome fight but Tom and his paint brush won out.—Ullysses Dispatch.

—W. H. Selzer of Geneva, Nebraska, is in the city Thursday, accompanied by Mrs. Selzer. They were on their way to Humphrey to visit friends, and were the guests while here of Robert Saley. Mr. Selzer was a very welcome caller at Journal headquarters. The journal of local events that we have been issuing regularly for the past 1,643 weeks, have been always gladly welcomed at his place, and he tells us that we cannot know how much the paper from the old home is appreciated by them. On his inquiry of A. M. Jennings, we read our last letter from his old friend, now at Fitzgerald, Georgia, and could see that it was almost like hearing his talk. Veterans are well, notwithstanding difference of latitude and politics.

—Mrs. Parthenia Neely has used for divorce from John N. Neely a well known railway man, setting up a description as the ground for securing the matrimonial knot. Mrs. Neely who is the daughter of a prominent attorney and connected with two of Omaha's pioneer families, has been conspicuous in social circles and for some time sang at Trinity cathedral. She wedded Mr. Neely in 1898 and until some months ago when they separated she taking their child and going to live with her parents, Judge and Mrs. Bowman at the Beaches—nobody had a suspicion that even an incompatibility of temperament existed. The husband has lately changed his position going from a city office to one that keeps him traveling on the road.—Omaha World-Herald.

—Hog cholera seems to be one of the unsolved problems, if we are to judge by the losses we read about. Every once in a while, it makes way with about all the hogs of a vicinity before it stops its deadly work. The Leigh World, in the following paragraph, recites anew a fact in the history of hog-raising: "Hog cholera has not abated in the neighborhood up to the present time. For the past year cholera has been in evidence in some parts of the neighborhood, and the effects of it are easily noticed on the market. Very few hogs are coming into market in Leigh at present, and the few that are coming are of a very poor quality, either being too young or too thin. The last person's hope to have the disease is G. W. Draper south of town. P. F. Wulfschlaeger has also recently lost a number."

—On hearing that an assault had been committed Sunday evening in Frankfort park, the trouble being between two married men concerning a woman, a JOURNAL reporter started out in search of the truth, and found that a traveling man from Omaha had been going stray while in the city, was caught here he ought not have been, and was somewhat severely dealt with. Not being killed outright, but considerably disfigured, he reported that he had been assaulted in the park by two huns, adding a scandal on the city police's good name to his own infamous conduct while within the city's gate. One's character, for the most part, determines one's associations, and all together make the life we are now living good, bad or indifferent. Afflicted while in the line of duty is often commendable, but what shall be said of dishonor crowned with infamy and mortal injury?
