—Charles Anderson's 13-year-old boy while cutting bands for a threshing machine at John Miller's five miles south of town yesterday, was caught by the trousers legs on the tumbler rod of the machine and after performing a number of revolutions which were too swift to count, landed on the ground between the machine with every thread of his clothes stripped from him. His father, who was working near him, wrapped him up in borrowed clothes and hurried him to town to a doctor. After examination Dr. Walker reports his injuries confined to extensive but superficial bruises and expresses the opinion that the boy will be around again in a few days.—Lindsay Post.
—Lon Miller, while in the city last week, informed us that he is interested with his brother Charles in mining, their property being located within a few miles of Prescott, Arizona, with good prospects ahead. They have prospected to the south a distance of 200 feet, and last year they put in place a stamp mill, engine, etc., etc., at a cost of several thousand dollars and Lon is quite confident they will in time strike it rich. Mr. Miller is also president of the school board of South Omaha and remained in town only a day, having to return to be present at the opening of the schools. George Westcott, brother-in-law of Mr. Miller, was also in town Thursday and Friday. Both Mr. Miller and Mr. Westcott are prominent business men of South Omaha.
—The manager of the North opera house will present Wednesday evening, Sept. 3d, the latest sensation, the new melodrama entitled "The Convict's Daughter," which has met with brilliant success everywhere. Plays whose prominent features are love, heart interest, heroism, comedy, pathos, vice and virtue, always find an audience and these are the dominant characteristics of the "Convict's Daughter." The scenes are laid in the South and various types of life—good, bad and indifferent—including a unique tramp character are introduced, while the scenic display is said to surpass all previous attempts at stage realism. The plot is original and reasonably developed in five acts of intense action. One scene shows a convict jumping from his prison wall to the roof of a passing freight train, which is conceded to be the most astounding and realistic scene ever presented on the stage. It is a most expensive production.
