The Grand Island beet sugar factory began operations this week.

D. E. THOMPSON, of Lincoln, has been appointed minister to Brazil. The salary of the position is \$12,000 per year.

The Pure Food Commission of Illinois has recently started fifty-two units against violators of the pure food laws of that state.

Over at Carthage, Illinois, last week, a ten-year-old daughter of C. N. Martin died after a few hours' illness from eating green bananas.

A TIDAL wave swept the Odawara district, near Yokohama, Japan, on the 29th and overwhelmed many houses. Five hundred people are reported to have been drowned.

A FEAR weighing seventeen ounces and measuring twelve and a half inches in circumference, supposed to be the largest ever raised in Nebraska, was handled at Talmage recently.

A FARM consisting of 200 acres in York county, this state, was sold last week for the princely sum of an even \$20,000, the most money ever paid by one man for a farm in this county.

A FARM of 240 acres seven miles north of Falls City, this state, was sold one day last week. Fred Ringo was the owner of the land and received \$16,900 for it. Nebraska is all right.

J. FINESTOCK MORLEY makes the announcement that he will fight Roosevelt in 1924. Well, there's one trust magnate that is fermenting the republicans and we doubt not there'll be many more ere they get through with "Tiddy."

BRIAN ZOLA, the famous French novelist, died in Paris Monday morning, aged 62 years. He was found dead in his home from a myocardial infarction. He was hospitalized by friends from a stroke. At the same time, it is stated, there are indications of suicide. He and his wife had returned to Paris Saturday after spending three months in the country.

PRESIDENT ROOSEVELT underwent another operation Sunday on account of his injured leg. A bulletin issued by Secretary Corderly at 3:20 that day says: "The increase in local symptoms and a rise in temperature rendered it necessary to make an incision into the small cavity, exposing the bone, which was found to be slightly affected. Thorough drainage is now established and the physician felt confident that recovery will be unimpeded."

It behooves every American who loves his country and who is proud of the party made great by men like Lincoln and McKinley, to not be misled by any will-o-the-wisp fantasy this fall. The real issue is prosperity. The question to be considered is whether a vote shall be cast in November for a congressman who will maintain the present condition, or for one who might use his influence in a direction that will bring disaster to his fellow men. J. J. McArthur is the safe man to vote for.

ALREADY the mothers of the land have begun to resent the unjust and indecent attack upon the American army in the Philippines, contained in the recently published democratic campaign book. A democratic spin-doctor in Wisconsin who speaks disparagingly of the army, was visited by a crowd of angry mothers, who scolded him out of town. It seems that these of the native sons of the town were fighting in the Philippines at the time, and this last gave the situation a peculiar turn that couldn't be over-looked.

HOW WE COMPARE WITH THE REST OF THE WORLD.

The following, taken from a speech of Hon. J. G. Gallagher of New Hampshire on Prosperity, before the senate, is worth noting, not only as a matter of political influence, but as an item in history:
Our program under the Dingley tariff has been such that we no longer compare the United States with other nations, but with all the rest of the world combined. With less than 5 per cent of the population and only 7 per cent of the area, we, nevertheless, about equal industrially to half the remainder of mankind.

We equal or surpass all the rest of the world in cereals, cotton, eggs, petroleum, leather products, copper, and forest products.
Of the following we produce two-thirds as much as the rest of the world: Coal, pig iron, steel, and three-fifths of the total food and agricultural products and manufactures.

We produce one-half as much as the rest of the world in silver, iron ore, fish; one-third as much in gold, wheat, oats, hay, butter, and cheese; one-fourth as much in hops and beer; one-fifth to one-tenth as much in barbed wire and wool.

We consume, reckoned in value, twice as much corn as all the rest of the world combined, one-fifth as much one-tenth as much wheat, one-third as much cotton, one-fifth as much wool, one-third as much sugar, one-half as much fish, nearly as much coffee, one-fourth as much tea, about three-fifths as much meat—all food and agricultural products.

We have one-third as much wealth as all the rest of the world, one-third as much gold, one-fifth as much silver, one-tenth as much copper, one-third as much many other commodities, one-third as much as the rest of the world combined.

Remember, the comparison is not with the world, but with all the rest of the world, besides ourselves.
According to the junior senator from New York (Mr. Dewey), who should be an unquestioned authority on railroad business, the freight carried on the railroads of the United States equals the freight carried on all the other railroads of the earth and by all the ocean shipping. To this should be added our immense lake and coast trade.

A COMMITTEE of citizens, headed by the publishers of a paper last Saturday evening, called in the county on the present coal shortage and high prices by asking for a resurvey for the coal companies and coal carrying roads. A bill in equity was filed in the supreme court against the following named corporations: The Philadelphia & Reading Railroad company; the Central Railroad of New Jersey; the Lehigh Valley Railroad company; the Delaware, Lackawanna & Western Railroad company; the Delaware & Hudson company; the New York, Ontario & Western railroad; the Erie Railroad company; the Pennsylvania Coal company and the Philadelphia & Reading Iron & Coal company. The petitioners ask that a receiver be appointed for the benefit of all concerned upon such terms and in such amounts, with such agents and attorneys, and with such rates of wages and other conditions of employment and at such prices for goods produced and sold, as the court shall from time to time adjudge proper. The bill is based upon the legal theory of the coal situation, given by H. W. Chaplin, a lawyer. Mr. Chaplin says in support of his position: "Since the public have a right in the mines, a right to have coal forthwith mined for immediate consumption, and have a right to have that coal immediately transported out of the mine regions, by the coal carrying roads, a court of equity, if no other solution of the difficulty is open, has authority to send upon the application of a representative proportion of the people undoubtedly will appoint a receiver or receivers to take into their hands the entire coal business, and to run it in their place." A subpoena to serve on the defendants, giving notice of the bringing of the suit, was taken out Monday by the plaintiff lawyer, and it will probably be returnable in November.

From year to year, it is being demonstrated that Nebraska is in fact, though not formerly recognized as such, a winter wheat state. In August (1920) at report of the department of agriculture, at Washington, showing the estimated average yield per acre in the principal states, arranged in the order of acreage, as follows: Kansas, 8.7; Missouri, 18.12; California, 15; Indiana, 15; Ohio, 16; Nebraska, 22; Pennsylvania, 15; Oklahoma, 11.6; Michigan, 17.4. That the above report of the average yield per acre, so far as Nebraska at least is concerned, is conservatively correct, is shown by the statistics of the Nebraska Grain Dealers' association, in his crop report, No. 10, issued September 30, 1920, showing the following results, that were obtained from samples received from 600 well-distributed correspondents, who are country grain dealers in Nebraska. This shows the average yield per acre, in eastern Nebraska, of winter wheat, to be 24; in central Nebraska, 24.5; and in western Nebraska of 31 bushels, there being 1,808,688 acres, with an average yield of 29 1/2 per acre, making the yield of winter wheat in the state, 44,735,983 bushels.

While the above is no doubt a good approximation, and we know that could the wheat crop of this year all have been saved the yield would have shown remarkable results, still the 29th of September is early to give exact figures. Yet a comparison drawn between winter and spring wheat is much to the detriment of the latter, because a farmer can lose one crop of winter wheat in three and still best spring wheat.

ARTICLES of incorporation were filed at Falls City last week for the Sycamore Railway and Improvement company, the purpose of the corporation being to build a line of electric road from Falls City south to Topeka, Kansas, and north to Ashara, Nebraska.

District 44 and Vicinity.
A part of our equatorial storm got out of into the first of this week.
Pat Meahan's mail wagon was an hour late Monday on account of the storm.
The director has posted notice for a meeting to be held at the school house evening of October 6th for the purpose of electing a treasurer, which office was made vacant by the recent death of J. D. McMan.

About 14 inches of rain fell here last week from the 29th to 31st inclusive, since which time the plowmen can be seen in almost every field, and every one is trying to put in as much fall grain as they can while the ground is in such favorable condition.
All late corn and the effects of the killing frosts of the 19th, 20th and 21st of last week, in this vicinity at 40 per cent. Means were no more seen in the fields, and the corn is now mostly in the hands of the plowmen. Pumpkins and squashes about one-third of a crop. Turnips a full crop. Oats nearly a failure. Winter wheat sown and of good quality, yielding at the rate of 4 to 5 bushels to the acre. Bye about 70 per cent of a full crop. Woods, never better.

Platte Center.
[From the Standard.]
Last week Thomas Deck sold to Pat Foley 260 acres of the Walter Jewell farm for \$40 an acre. It has been but a few years since Mr. Deck bought this land for \$24 an acre. The land sold includes the farm on which A. Kunkle is living.
Frank Hayes started for Blaine, Washington, Tuesday evening, where he will join his father, who is employed in a saw mill. Frank has held the position of village marshal since his father went west early last spring. James Burrows, Jr., will wear the star until the regular meeting of the board next month, when a permanent appointment of some man will be made.
D. O. Lawrence informs us that he will commence within a few days to put in another telephone line east and southeast of town. It will reach as far south-east as Schmidt's mill and will be brought to Platte Center from a point about four miles east on the place road for the other line. There will be about a dozen subscribers on this line. He is also negotiating for the building of a line west and northwest of town.

From the Republican.
Mrs. Wm. Draper, who has been in the Columbus hospital for some time, will return home soon, as she is much improved.
Edgar Howard, G. W. Phillips, J. G. Becker and L. E. Latham of Columbus, were among those who attended the fusion stock convention here last Saturday.
A business change took place Wednesday, H. J. Handberg being succeeded by Smith & Mansfield of Albion. The stock will be transferred October 6, after being involved. L. J. Hendry will remain with the new firm and have charge of the grocery department. Both of the new proprietors are practical business men and will no doubt make a success of their venture.
Last Saturday J. G. Garlow and G. T. Stewart of the Independent telephone company were in Monroe looking over the prospects for the new line. They received much encouragement and there is no doubt but that Monroe will be one of the first towns in the county to be connected with Columbus. A farmer line will be run northwest from town, toward Litching, and probably be built this fall, as quite a number are anxious for phones.

COMPARISON OF RECORDS

Fusion Extravagance vs. Republican Economy.
SOME FACTS FOR THE VOTERS.
Debit Which Was Left by the Fusion Administration Has Been Wiped Out and State Institutions' Ledger Now Shows a Good Surplus.
Nothing has done more towards exposing the extravagance of the fusionists in managing the affairs of the state than the economy and business-like methods of the incumbent Republican officials.
An examination of the records discloses the fact that there now remains, of the total sum appropriated for the maintenance of the various departments of the state institutions, a surplus of \$189,235.65, and an unexpended balance of \$435,000.
How different is this from the condition of affairs when the fusionists went out of power!
The fusionists entirely exhausted the appropriation and had a shortage of \$149,000 in the form of unpaid bills. The difference in favor of the Republican administration is the difference between a surplus of \$189,235.65 and a deficiency of \$149,000, or \$338,235.65. This difference, so large as to be almost startling, is due to economy on the part of the Republicans and wasteful and reckless profligacy and extravagance on the part of the fusionists.

Fusionists Out for Spella.
The principal savings has been made in connection with the state institutions. These were the principal spoils of the fusionists. Into them more than 200 relatives and friends of fusion leaders were clandestinely smuggled there to be housed, fed and often clothed at the expense of the state. When the fusionists turned over the institutions there were 227 people being fed and sheltered in them who were neither employes nor inmates. At one institution two separate tables were being maintained for twenty-seven fusion parasites. At another, one-quarter of the accommodations was monopolized by relatives and friends of the official in charge. At another, outsiders were taken in and boarded at the state's expense and for which the state received no compensation. And still at another private house rent and office rent were paid in coal and groceries stolen from the state, while at another a fusion newspaper plant was given three rooms with light, heat, power and a monopoly of the job printing, for all of which the dear taxpayers had to go into their pockets and settle.

At the Beatrice institution a fusion superintendent, after having made way with nearly everything that was not riveted down, destroyed the records to conceal his crime. There are yet warrants in the hands of the present superintendent of that institution that were issued against two persons made by the last legislature that have never been called for. The presumption is that the claims, which were filed before the fusionists went out of power, were fraudulent and the best evidence of this is the warrants, which were issued against two persons who have not as yet been claimed by the individuals in whose name the claims were filed and the warrants drawn.
These and other fusion raids on the treasury wiped out the appropriations made for the support of the state institutions in connection with current expenses the state has ever been called on to pay.

Governor Savage's Instructions.
When Governor Savage assumed the reins of government one of his first acts was to call the superintendents of the state institutions and enjoin them to the strictest economy consistent with good government. Governor Savage is a hard-headed, methodical man. He has had hard and efficient training in business life. "I want you to treat your family and spend the money of the state institutions and enjoin them to the strictest economy consistent with good government.
