More of It in the Philippines Than i Cuba-Regret Expressed that Tariff to Encourage Development was Not Enacted.

arrived in this city from Washington | weeks' board at Coronado beach. Un-Thursday night and took up his quarters at the Bostwick hotel. His business interests demand that he remain the bay from that city and one day here for some time. Speaking of the at the Grand Canyon would cost a Philippine islands, the senator said: Chicagoan \$138, including everything. I advocate now, as I did then, that there should be inaugurated a system of protection which will further the growth and development of the interests of the islands. This has particular application to such industries as do not and cannot compete with similar industries in the United States As to the Philippine tariff bill, I will say that I am sorry it did not nass. though the reason for its failure is easy to understand. Had there been an investment of American capital made in these islands as is now in Cuba, there is no question, in my mind, that more strenuous efforts would have been put forth and that the passing of the bill would have resulted. To me this is unquestionable proof that the interest manifested in behalf of Cuba was purely mercernary, fathered by those who have much capital invested in that island. Talk about sympathy with distress and moral obligation! Nonscnse! Why, there never was a time since the American occupation of Cuba that there has existed there one-tenth the poverty and distress which at this moment exists in portions of the Philippine islands, yet neither press nor

these undesirable conditions." Mr. Dietrich said that he had no considered the Nebraska revenue bill with sufficient minuteness to express an opinion, but in regard to Nebraska affairs he expressed his regret that a generous appropriation had not been made for the establishing of an experimental farm in the western portion of the state. Conditions there have independent characteristics which demand particular attention for their proper development. There is nothing in the power of the legislature to do which can add more to the material welfare of the state than the establishment of such a farm.
