—Schuyler is having a frightful time with high water. One of the incidents which we take from the Schuyler Sun gives an idea of the unpleasant situation:

—Prof. E. B. Sherman has a novel method of navigation in his cellar. Of course the place is flooded like all the rest, but the professor does not let a little thing like that worry him in the least. When he wants anything in that cellar, he steps in a big wooden bucket with one foot and in a tub with the other and when he lifts a foot the tub (or bucket) will rise and float to where he wants to put his foot down and thus he gets ambulated.

—Next week the county institute will begin its two weeks' session, the first week being devoted to the institute lectures. The examinations will be held on the 13th, 14th, 15th and 17th. Gillam of Milwaukee, Wis., Sup't of Pawnee City, and Sup't Atkinson of York are all gentlemen of high educational standing. Columbus citizens should attend the institute sessions not only because they would find the lectures very interesting but to show to the teachers and those in charge that they are concerned in their work. Some time during the institute lectures will be given by State Sup't Fowler and Prof. Gilman.

—The body of Michael Morrissey, a former well known resident of this city, who lost his life in Canada about a year ago, arrived at Plattsmouth for burial one day last week. He made the trip to Canada to look after some land interests. One day his lifeless body was found near the road side some distance from his destination. At first foul play was suspected, but the theory later advanced was that he had frozen to death. The body was buried there, but as the widow lives in Plattsmouth arrangements were made to transfer the body to the family burial lot in the Catholic cemetery of that city.
