FROM CREDIT TO CASH.

TO ENABLE us to meet all possible competition and to be in a position to place goods on sale at the least possible advance over original cost and to eliminate all loss from bad accounts and the great annoyance, expense and labor for the keeping and collection of same, we have decided to adopt the cash system, and on and after November 1st, our business will be conducted on this basis.

Our experience in our new Dry Goods Department confirms our previous opinion, that it is the true system for modern up-to-date retail trade. The public has shown the full appreciation of this system by the prices that we have named in this department as compared with prices in credit stores, by their very liberal patronage.

We thank the public for their very liberal patronage under the old system.

We know that after you carefully think over the mutual benefits of the change, together with our convincing argument by the comparison of credit prices with cash prices which we shall make from time to time you will still stay with us.

We hope to merit a continuance of your patronage.
