POULTRY

Buying an incubator.

From Farmers' Review: Many persons who are planning to engage more extensively in the poultry business are now studying the advisability of buying an incubator.

The way to prevent huddle eggs is to place the roosts low and have the floor covered with litter.

Black Spanish. The Black Spanish is one of the oldest varieties of domestic poultry.

Wattles and the white face and lobes peculiar to the breed, contrasting with their glossy black plumage, render them most striking fowls.

Notes on English Farming. President Mills of the Ontario Agricultural College recently made a tour of observation through Great Britain.

For the most part, the country districts of Great Britain and Ireland have an orderly, finished look.

As to the kind or particular make of incubator, there is perhaps less choice than manufacturers themselves would lead us to believe.

Incubator. In regard to the requirements of the ordinary poultry raiser, would say that this matter should be decided by the nature of the different grades of both incubators and brooders, of varying prices.

Making a Hotbed. Please give plans and directions for making a hotbed, adapted to be used for starting and handling early vegetables and sweet potato plants for the home garden.

May Crop of 1903. Below we publish by states and territories the figures of the hay crop of 1903, as compiled by the United States Department of Agriculture:

Table with 5 columns: State/Territory, Total, Average, etc.

HORTICULTURE

Too Rich Soil Detrimental.

In the growth of all plants that form farm crops there seem to be two processes that govern an increase.

Points on Melon Growing. During the past two years I have been making a study of muskmelon and have been growing a good many varieties.

With this melon I believe a man could work up a good local market. It might not take in Chicago, because it is not known.

We sow the seed in the open field, though there are some gardeners that sow the seed in a hotbed.

The time of this open field planting of the seed is about the middle of May in Champagne.

Please give plans and directions for making a hotbed, adapted to be used for starting and handling early vegetables and sweet potato plants for the home garden.

THE VETERANS

The End of the Week.

It happens every Saturday, when all the chores is done.

course of six months he was sent home. There was little change in his condition for years, but one night, in rescuing one of his children from a burning house, he brought on a violent spasm of coughing and a hemorrhage from the lungs.

The slender bit of wood had been drawn down the bronchial tubes into the lung tissue, and had become imbedded in a way that produced great suffering.
