UST FIVE MONTHS AGO this firm changed from credit to cash. At that time many of our good friends were doubtful of our success, reasoning that a strictly cash system was alright for a large city but that our little city of Columbus was too small. Many others predidted disaster, while the KNOCKERS. (peace to their ashes) predicted that our latch strings would be soon decorated with crepe.

We are still much alive, though seldom kicking-we have no reason for any kick. besides we haven't time.

With the help of our customers and in spite of the knockers-big and little-we are today doing the biggest business in Columbus with all departments of this large merchandising outfit full and running over with the choicest and best selected lines of mercandise that the markets can produce. Our sales have averaged from 10% to 20% larger in each department each month since we have been selling for cash as compared with the same months last year when selling on credit. With this showing it is evident that the good people of Columbus are convinced that they can do better trading at a cash store than they can where they sell on credit. We want to thank you for the encouragement and support you have given us. We want every customer to know we value and appreciate this support.
