GETS OUT OF HIS DEPTH.

Among such a mass of players as comprises a great orchestra there are 'characters" enough to supply a new Dickens. One of these characters, according to the Philadelphia Saturday Evening Post, is noted more for his love of big words than knowledge of their meaning. During Mr. Seidl's lifetime he played in the orchestra at Brighton beach. One day the tuba player, who sat back of him, had a very difficult part to play in Liszt's symphonic poem, "Mazeppa." Hearing his heartfelt sigh of relief on its con- he really needs. clusion. Mr. Malaprop turned and asked, "Barnum had one, hadn't he?"

"What?" was the query. toward their captives," she told her- | quarter of the sky because it knows "A Mazeppa, of course," was the answer. He had confounded the hero of Byron with a zebra.

Where there has been trouble with filled with hot water, for the double as cream varies so much in butter-fat content. It is nothing unusual to meet cream obtained from the deep-setting process which contains considerably less than 20 per cent butter fat, while shallow pan cream is usually considerably richer, and cream obtained by the use of a separator will test all the way from 20 to 40 per cent. Cream testing 20 per cent butter fat-a very common test for cream from the deepsetting process-will make between 2 and 21/2 pounds of butter per gallon of cream, or about one pound of butter per 11/2 pounds of cream.-J. W. M.

Cement Anchor Posts.

C. C.-How would cement answer for constructing anchor posts for a fence of 11 strands of coil spring wire; the posts would be sunk 5 or 6 feet in the ground. In what propor tion should cement and sand be

Cement answers well for making ordinary fence posts, but where there rei of cement

A Tonic for Fowle. Mrs. M.-Would a small quantity of ground gentian, say a quarter of a teaspoonful, fed in a mash once a day to a dozen hens, be harmful or beneficial to the fowls? They get no vegetables, only a few boiled potatoes

If the hens appear to be down in condition and need toning up, a small quantity of ground gentian fed daily as indicated would undoubtedly prove beneficial. It is not advisable, how ever, to be dosing healthy fowls, but a light tonic at the end of a long winter should be all right until the birds can get out to the green grass.

Feed for Chickens Mrs. J. P .- Last year I hatched chickens with an incubator, but they died when a few days old. They appeared to have bowel trouble. I gave them curd and bread soaked in milk Was this proper food for them?

Chickens should receive no food for the first thirty-six hours, and then they should have light food such as bread scaked in milk and squeezed almost dry, besides coarse cracked wheat or oats groats. Curd is very indigestible and likely to cause bowel

Cabbage Magget F. R.-What will destroy the little white grubs that are hatched around the roots of young and early cabbage

For the cabbage maggot, probably the easiest and best remedy is pulling away the soil down to the true roots
