The authorship of "Opportunity," on which rests the literary fame of the late Senator Ingalis of Kansas, is claimed in a June magazine article by Dr. Nicoli Gigliotti of Erie, Pa., who says he wrote the sonnet first and published it in Italian in 1887. He prints a "deadly parallel" to prove his claim. He called it "Il Fato."

THE FASTEST WARSHIP AFLOAT. | COMMANDS AT PORT ARTHUR. Gen. Stoessel One of the Foremost

Proud Honor Held by the Kentucky of the U. S. Navy.

In stripping the Kearsarge of her laurels gained in her record-breaking the beleaguered Port Arthur garrison run from Southampton to New York and has been in supreme control the battleship Kentucky, one of the since Viceroy Alexieff departed for great fighting ships of the navy, Mukden some weeks ago. Gen. Stoesmarked up the records for the navies | sel distinguished himself in the Turkof the world and demonstrated once ish war, having fought at Plevna and more the supremacy of American naval architecture.

In the fighting efficiency of the modern battleship speed and endurance are important factors. The floating fortress must not only have the guns and the men behind the guns, but she must be able to cover long distances at a high rate of speed without mishap. Judged by these standards the Kentucky must be crowned queen of the American navy.

Under the command of Captain Robert M. Berry and with Rear Admiral Robley D. Evans and staff on board. deira, 3,885 knots, at an average speed of 13.82 knots an hour. The record of the trip includes 12,916 knots from Hongkong in thirty-nine steaming days, being an average of 315 knots a day, including the slow passage of the Suez canal, a record reached by no other warship of the United States. During her absence of three years and seven months on the other side of the world her total sailing was 68,157 knots.

Several years ago the Kearsarge stuck her nose in the air and made a dash from Southampton to New York at an average of 13.50 knots under natural draught. Upon this achievement she has received the plaudits of the whole country. It was pointed out that she had steamed 5,000 miles before her record run without having made repairs. But the Kentucky, before the run completed on Saturday, had steamed 9,000 miles to Honolulu and back, making a total distance of 18,000 miles, without repairs to en-

Empire of "The Great Han" Korean school children, when placed side by side with Chinese and Japan-ese pupils, have always shown them-selves to be, from an intellectual point of view, surperior. This is the more surprising when it is considered that the ordinary curriculum of a country school embraces only the study of the classics of two of China's sages, a native author's volume on the "eternal fitness" of things, and a treatise on geography, from which the accompanying map is taken. On the map the circle of land round

about is North and South America, divided so as to suit the flat surface; 79 is Korea, 80 is China, with the Yang-tee cutting it in two; 32 is Japan, 81 is Annam, 82 India, and 86 Africa. The inland sea north of Africa is the Mediterranean, while 83 and the surrounding islands are those of the South Pacific; 78 is Russia, which is by the Koreans called "the Midnight Kingdom." 1, 2, and 3, which stand for the British Isles, are called. respectively, "ormouthed," "white," and "busy." The characteristic "white" is to be taken literally, for these Saxons claim a paleness in the skin more marked than that of any other people. This, together with the extravagant use of what they call "soap," makes true in their case the hieroglyphic "white." "Busy" points to their trading and colonizing propensities, for which they are especially noted, annexing and claiming shares

equally in fame and importance with the Korean tiger of the East, the two

A Tame Eagle.

Mr. Damarin, county treasurer of Havana, a town in Illinois, has a pet eagle, one that stays in the Courthouse park without being caged. He is at liberty to go when and where he pleases. Mr. Damarin feeds his pet twice a day. He can go up to him and stroke him, just as he would a cat or dog. When there is any public festival in Havana the eagle proves a great attraction.

This is the history of the bird: A gentleman shot and crippled him last autumn, and took him home and kept him until this spring, when his son brought him to Havana and put him in a squirrel case. But that was too small, and he could not learn to fly. as one of his wings had been injured. The county officers built a cage about twelve feet square, and he was kept in that cage for about six weeks. A stump of a tree was put in the cage, and the eagle stayed on that tree all the time when not flying or walking in the park. As even the cage was not large enough to let him fly, his captors gave him his liberty. But the bird will not leave. He eats fresh beef, kidneys, or liver.-Chicago Inter

Loan Was Costly.
