## MORGAN'S COAT OF ARMS.

Financier Credited With Remark Both

**Humorous and True.** J. Pierpont Morgan is gifted with a great deal more of humor than is generally known. Not long ago, while in London, he was introduced to a lady who made some pretensions to peerage. "Pardon me," said this lady. haughtily, "to which Morgans do you belong?" "Oh, we are an independent branch," replied Mr. Morgan, slyly, "but we date back to the Norman kings." "Ah, then you have a coat of arms?" Mr. Morgan dug down into his pocket and brought torth a shining American \$20 gold piece. "This," he said, "is our coat of arms; a few other families have adopted the same emblem. But," he continued, confidentially, "we are gathering them in as fast as possible."

Not a Practical Politician. Senator Depew addressed Yale students a few days ago, his subject oeing politics. His speech was pitched in a high key, and some of his auditors took note of this fact. "That was a beautiful speech, senator," said a reckless junior in the evening. "But we feel ourselves incapable of applying your theories to actual life. Won't you give us a footnote-something. senator, if you please, on practical politics?" But the Roman-featured statesman answered only: "Good Lord! That's not in my line. Not long ago, in a pause in a ses sion of the Supreme Court, the gallery saw Justice Harlan write something on a bit of paper and, calling a page, send it down to former Attorney General Griggs, who, himself an ardent golfer, was at the time before the tribunal about to plead a case. Sixty Filipines on the United States of Alaska last year. Twenty of them were detailed for laying and repairing cables. They were thus engaged for three months, during which time they experienced a great deal of rough weather, one voyage having been so trying that the Burnside narrowlly escaped destruction. The Fillpince, however, in spite of the severe climate and the difficult nature of the work, proved so efficient and trustworthy that Lieut.-Col. Allen of the United States signal corps says in his official report: "The work was always cheerfully performed by them, and in no case during the entire trip was any sort of punishment administered to these men. They continually grew in strengtah, and with the exception of slight colds from exposure they were in excellent health throughout. The point desired to be made prominent is that these men taken from the Philippine islands and sent directly into the cold of Alaska were able to perform all the duties re quired of them in the most satisfactory manner." Gen. Greely says: "The marked success of the past year has caused the chief signal officer of the army to engage a Filipino crew for the operations in Alaskan waters for the coming summer."
