Star Route.

Wm. Johannes informed us that the farmers are afraid to pasture their corn stalks this fall, owing to the corn ripening without a killing frost. It is feared the stalks will prove poisonous to cattle.

Head grading is the paramount issue just at present in the hills north of Shell Creek. It is done after the Boer style in South Africa. They take one kope at a time.

UNION PACIFIC.

Its Superb Condition and Great Prospect.

The Wall Street Journal of Monday September 12 contains the following, interview with Mr. E. P. Vining, (a former Traffic Manager of the Union Pacific) on the present and future prospects of that road.

"I came east over the Central and Union Pacific, and over the best lines to the Atlantic seaboard; but I am bound to say that the smoothest railroad upon which I traveled was the Union Pacific. The main line has been practically rebuilt and re-equipped, and it is now in a superb condition. The rebuilding of the Central Pacific is nearly completed, and the old trans-continental highway west of Omaha is now as fine a line upon which to travel as the Chicago & North Western or the Lake Shore to the east."

"I usually amuse myself by timing with my watch the speed of the train, according to the length of rails as noted in the joints between the wheels; but I had great difficulty on the Union Pacific in getting count of the rail joints, so smooth running was this newly built road."

"Trans-continental routes have not been slaughtered as some people expected when other trans continental routes were opened, and the Southern Pacific still has the commanding position in the California trade. With its steamship lines from the Gulf to New York it can carry freight on schedule time while the all-rail lines cannot command deliveries of their eastern connections."

"The Atchafalaya, while a popular line, cannot guarantee delivery of freight in the east; and it has not the hold on local traffic and the merchants by reason of its local lines, that the Southern Pacific maintains."

"Still, the Atchafalaya is very prosperous, and the outlook for business on the Pacific coast was never better. The rainfall last year was well above the average; crops were abundant upon the whole coast and prosperity extends the entire length of the Pacific coast line of the United States from the fruit and oil fields of the south to the lumber fields and fisheries of the north."

"The outlook for business from California over the Central, Southern and Union Pacific lines was never so great in its history as today."

"I am not surprised to learn that the managers of the Union Pacific expect in a few years to rank their property with the older lines of the east as substantial, regular dividend investment properties; and that they hope a few years from now to have the Union Pacific entirely out of Wall street and in the hands of investors at a higher dividend rate than is now being paid."
