We have not heard that the agreeable surprise did him any harm, for he looked happy on Monday morning. Dr. Jones reports all concerned doing well.
On Tuesday October 11th Mrs. D. J. Clark was greatly surprised by about 40 or 50 of her relatives and friends gathering for dinner. The guests being her 50th birthday, (but by the way Mrs. Clark hopped around looking after the wants of her guests, one might have thought it was her 20th instead of 50th birthday.) It happened this way. Mrs. Clark had been in Omaha visiting and just returned the day before. Her daughter, Mrs. Dean, Mr. Simonson, Mrs. Stevens and Mrs. Simonson got their heads together and determined to give their mother a genuine surprise, so they went to work, and cooked up and prepared a royal feast, one of those we read about. On Tuesday morning Mrs. Clark was visiting one of her neighbors, and there people were into the secret so they took good care to keep her there until almost noon, to enable those who were preparing the viands to complete the preparations. When most of those invited were assembled, in walked Mrs. Clark. Her face was a study. She was so taken aback, she could say nothing for a few seconds, then realizing the situation she lost no time in making her guests comfortable and at home, in which capacity none can excel Mrs. Clark. The hostess was the proud recipient of many useful presents, among them being: Two sets of teaspoons, berry spoon, tooth pick holder, hot water jug, glove bag, cracker jar, glass fruit dish, cake plate, towels, napkin rings, and a quantity of fruit.
On Sunday evening, Sunday school rally was held at the Methodist church. The church was literally packed and many could not even find standing room. Humphrey.
Berge and McKillip opened the populist and fusion campaign at Humphrey today. They were billed for a talk last night, but an accident on the railroad and rains and their fears of "truste" in the way the farmer travels prevented their appearance, until today. Mr. Swallow who a few years ago tried to make a love-feast with fusion supporters with D. A. Hale, the anti-monopolist or populist (by the way McKillip is a son-in-law of the late Dave Hale,) acting as chairman arose and said "The first speaker needs no introduction. It is P. E. McKillip." The audience cheered him. He told us many of what might be called funny stories. While old to some of us, he claimed they were original. The climax was reached when he told how he weaned a calf. "As his platform on the tariff he said, 'while I was on the ranch, (just then Edgar Howard's bird flew in the back way alighted on McKillip's shoulder and said, 'you bet'!" In the western part of the state, I had a cow. That cow had a bull calf, (no excuse offered to ladies as there were only four present) and that calf was allowed to suck it (the calf's) mother and it grew and became strong and prospered and he (McKillip, not the calf) wanted the calf to stop sucking, but he (the calf) refused and followed the cow, and insisted that be (McKillip) was interfering with his (the calf's) rights. So he said he (McKillip) used severe measures, as the calf insisted on sucking so he caught him and split his (the calf's) tongue. Then the bird says, 'MAO let me see your tongue' and the audience thought he meant his divided platform. It was a nice speech and it is said that it caught E. R. Cow-

dery, Drake and possibly Cookingham and as he sat down and smiled the bird said, "That is right Pat, as you killed the calf or stunted his growth, if ever these people let you get to congress you will likewise strangle our live industries." And the bird alighted on the table to begin waiting for the candidate to begin waiting. Mr. Swallow then introduced Mr. Berge, who entertained us by telling us what he thought of the situation. He told the story of the Irishman who desperately fought the highwayman and after he had been mastered Berge said, "He was like me this minute. He had only 30 cents" (Howard's bird was heard to say "two drinks please.") Mr. Berge left a good impression of himself as an artful campaigner. He told how the land owner had to pay his taxes, under the new revenue law. He did not tell the renter of land how his taxes would be reduced, as what he thought of the situation. And as the country north from Humphrey is owned by non-residents our people are willing that they should pay their share of taxes. It is not the land owner, who lives on his land that is raised in taxes as he has also much personal property which is reduced.
Joseph Gahr one of our old timers, who has lived here for about twenty-two years, died last Thursday morning at the St. Mary's hospital at Columbus. His son Walter took charge of the body and had him brought home and buried from the Catholic church, on Saturday morning. The pall bearers here were Peter Bender, Joseph Bruening, Jacob Krebs, Joseph Gilsdorf, Chris Schroming, Henry Bruening, Theo. Otis, and Michael Zarlin. The funeral was well attended and he was laid to rest in the Catholic cemetery. He leaves four children, all of whom are married and several grand children to miss the old gentleman's kindly smile and word of cheer.
Mathew Gilsdorf, jr., and Peter Ruffing, jr., were elected to membership in Ak-Sar-Ben camp No. 99 W. O. W., Thursday last.
J. W. Bender was too busy to be present at the pop meeting Friday.
If McKillip weaned that calf he ought to be elected to congress, some other time.
Mrs. C. H. Swallow returned from a visit to her sisters in Boyd county Saturday.
A dead chicken and a "dead drunk" man were locked up Saturday evening. It is said the chicken stole the man.

LIBRARY DAY.—County superintendent Leavy calls our attention to the fact that October 21, next Friday, is library day, and urges that all teachers use necessary means to interest the children in the world of books.
The advantages of the young people of today in the way of good cheap literature is so much better than that of twenty or even ten years ago, that there is little excuse for any country school not to possess a library of its own. Many of the Platte county teachers have assisted Superintendent Leavy in his plans to put in libraries and have the thanks of the children and parents for their efforts.

A LAND OF WONDERS.
The Sightseer Finds Many Things of Interest in California.
California has numerous natural bridges, caves, etc. of no little interest. The Mammoth Cave of Calaveras, discovered by miners in 1850; the Alabaster Cave; the Crystal Palace Cave, containing a number of attractive subterranean apartments, such as the bridal chamber, the Crystal Palace Loom. A curious apartment called Music Hall, where the deposits of aqueous origin not only take the form of organic pipes, sounding boards etc., but emit, when struck, musical sounds and vibrations. Near this cave are two natural bridges which the tourist can visit and return to the railroad within half an hour. The only natural way to reach these scenes of interest is via "The Overland Limited, Route," comprising the Union Pacific and Southern Pacific, now really one line. The only line running through trains to San Francisco from Omaha, its fast train, arriving sixteen hours ahead of all competitors. Pamphlets and maps describing the wonders of California, and full information about the most comfortable and direct route to the Pacific Coast, can be obtained of E. L. Loman, G. P. & T. A., Omaha, Neb.

Following is the names of new officers elected, a few of whom hold over from the last term: Wm. Schilz, president; F. Walters, vice-president; L. L. Werner, secretary; J. H. Lindas, treasurer. L. L. Werner was chosen the delegate to the supreme council of Catholic Knights, which meets in St. Louis, May 1905.
FOOT BALL.—The North Bend Foot Ball team was defeated on their home grounds last Saturday by the Columbus high school boys by a score of 46 to 0. The second down resulted in a touch down for Columbus. The ball was in the possession of the Columbus boys during the entire first half, North Bend having the ball but twice during the whole game. Although the North Bend team averaged about 10 yards heavier than their opponents, they were not able to stop them, Columbus failing to make the necessary five yards in one down but twice during the game. There was a large crowd in attendance with the best of order throughout, and the players came out intact. Columbus' full back McCloud, suffered somewhat after the game from a bad jar received in tackling although the injury proper was confined to a slight scratch on the nose. North Bend can be expected to show improvement in the return game with Columbus which will be played here within a month.
Fitzsimmons Under Arrest.
Just as we go to press we learn that an officer from Lincoln has placed E. O. Fitzsimmons of Lindsay under arrest on a warrant charging Fitzsimmons with grand larceny.
The charge is that Fitzsimmons, while at a hotel in Lincoln, on September 10th sent a boy to Mayer Bros. for a suit of clothes. The clothes alleged to have been taken to Fitzsimmons' room. Fitzsimmons is said to have retired to another room to try them on, and to have disappeared without accounting for them.
Fitzsimmons appears not to be worrying about it as he says it is a case of mistaken identity and that he can prove an alibi.
Later—Fitzsimmons is out on a writ of habeas corpus.

CLOTHES A CURSE.
Civilization the Means of Killing Many South Sea Natives.
The influence of the missionaries has certainly been for the most part beneficial to the natives of the south sea islands. The constant antagonism of the less reputable traders and the heathen, the lost human lotus and jetam of the south sea, to the missionaries is shining evidence that their work is for the real good of the natives.
But two things they have brought in the life of our Polynesian brothers are the coral beaches which are certainly salubrious. These are clothing and by consequence pneumonia.
In the good old days the rains beat upon the shining oil shoulders and back of the half naked natives harmlessly on the well pressed plumage of the wild duck, but now the cheap cotton shirt or white jacket clings wet and clammy to the skin, the quick chill strikes through the blood, and the end comes with appalling swiftness and certainty.
The gaudily ribboned, absurd little long hat planned to the great mass of chip black hair and the immodest hokul of the women and the tightly buttoned white barber's jacket above the harem legs of the men really reach the climax of absurdity, and what is worse, they are unwholesome both for health and morals.
But such is the costume of the saved! Well, that they be truly saved, for they have made a fair start in their "military" clothes to tick quickly the power of their new religion.—Atlantic.

IMITATION PEARLS.
The Chemical Process by Which They Are Produced.
Among all precious stones few are so extensively imitated as the pearl.
The real article is a silvery white, iridescent gem extracted from the pearl oyster. The genuine pearl is really an unfractured egg of the oyster.
Its imitation is arrived at by a chemical process. The liquor employed in the manufacture is called "essence of pearl." The base of this compound is prepared by throwing into water of ammonia the brilliant scales of a small river fish called the blay.
The scales are first carefully washed and put to soak in water, when the pearly-like film falls away and forms a sediment at the bottom of the vessel. This sediment is worth to the manufacturer \$5 an ounce.
White wax of mullage or gum arabic forms part of the mixture proper for the more important and expensive imitations, such as those made to imitate the rare oriental pearls which fetch fabulous prices.
The emerald is another stone which is cleverly imitated. A perfect emerald is the rarest stone in the world, though the trade name is after the ruby and the diamond. The best emeralds come from Peru, the imitations from France. The real article becomes electric by friction, and herein lies the difference between it and the imitation.
Caraforous Trout.
If trout are large enough they, like pike, will seize almost any living thing that comes in their way when hungry. I have one pond in which are two blanda. On one of these are some farmyard rats. On one occasion a full grown rat started to swim across. Before it had got halfway a twelve pound trout rose and took it under. I have given them young mice and cats when the farmer has been thrashing. They are very fond of these, and they take the largest frogs with avidity, but I have never seen them eat a toad. I have known them to take young water hens, and young birds of any kind thrown on the water are instantly made away with.—London Field.
