THE MIRACLE PORTRAIT. he Popular Legends of

Middle Ages.

One of the popular legends of the middle ages, which appears to have been known in various forms in all Catholic countries of southern Europe has been preserved in the folklore tales of those countries either with the title of "The Story of Beatrice and the Virgin" or as "The Miracle of Our Lady." According to the mediaeval legend Beatrice was a nun in a convent at Cologne. She knew nothing of the wicked outside world-having been placed in charge of the sisters when very young-but just as she was budding into womanhood she was seized with an uncontrollable desire to learn something of the mysteries lying beyond the great brown walls of what had always been her home. Finally, after many nights of tearful restless-

ness, she took the key of the sacristy, and, prostrating herself before a picture of the Virgin, she said, "Madonna, I am internally tormented with disquietude both day and night, and today. in order to relieve myself of this distracting agony, I leave this house and thy service to become a person of the world." For fifteen long years, so the story goes, she remained away from the convent, and in this time saw all the ups and downs and miseries of city life in the great European trade centers. During these many weary months she never forgot the quiet home she

had left at Cologne, and the kindly At last, when this mode of living had become unbearable, she returned to Cologne and applied at the convent for admission. Seeing that the person words in a kind of wild attempt to find out if possible whether the sisters
