For so much following statements that ought to cause the digging out of some farm machinery this week-then let it be drawn to the barn, cleaned up, oiled and put under cover.

Mr. Endicott, by a word picture, harvests were all a neglected binder would stand. Then he reasoned thus: "Let's see what profit there is in this kind of farming. Allow eighty acres ment as above mentioned, then three seasons would make the binder cut 240 acres. If the binder costs \$125 the wear and tear would amount to about 52 cents per acre. The machine with good care and shelter would cut at least seven seasons, making a total of 560 acres, the cost being a fraction over 22 cents per acre. Here we have a difference of 30 cents per acre, representing the profit between care and neglect of a single binder. It amounts to about \$160. The question is will \$160 bulld sufficient shelter for one self-binder. I believe that most of you will agree with me that such a sum would build shelter on the average farm in this country.

REPRIEVE FOR MRS. ROGERS.

Vermont Murderess Has Four Months Longer to Live.

Mrs. Mary Mabel Rogers, sentenced to die on the gallows at Windsor, VL. Feb. 3, was granted a reprieve of four months by Gov. Bell. .

E. B. Flynn, attorney for High Sheriff Henry H. Peck, his deputies and others at Windsor, presented the confession from Leon Perham, now serving a life sentence for complicity in the murder. The confession was obtained in Perham's cell in Windsor prison. Perham declares, the confession reads, that while Mrs. Rogers took part in the murder, he had testified she administered the chloroform to save his own neck.

The peculiar atrocity of the crime and the fact that a woman who is now only 22 years old wrought out in her mind the clever plot by which her husband, a man of powerful physique, came to his death, made the Rogers murder mystery sensational from the outset. New England doubtless has shown more anxiety concerning the ninted in diplomatic circles at Wash- fate of the prisoner than that of any criminal, similarly charged, in the annals of the Atlantic coast states.

The murder was committed the night of Aug. 13, 1902. The motive country they belong. There are eleven was Mrs. Rogers' passion for a man principal islands, the largest being Al- | who, as long as she was married, rebemarle. The total area is 2,400 mained indifferent to her. His name square miles, and the population 400. is Morris Knapp, and he was a member of the Bennington militia when he first met the woman.

When she was 17, Mary Callahan, the daughter of a woman whose life had been filled with hardship and misfortune and of a father who was irascible and wild, was wedded to Marcus Rogers of Bennington. The girl had been working here and there as a maid servant. She was treated gently, as it was feared her predisposition might run along the lines
