Small Home Inclosure.

A small outdoor water garden is just the thing to make one's place dirferent from the general run of commonplace gardens, says a writer in the Garden Magazine. Why not try some hardy water lilles this year.

I have two pools in my garden, and both are a source of great pleasure to my family and myself, as well as the stranger in my gates. One is planted with water lilles and the other with lotus. In the former we have flowers from spring to late autumn. The colors are white, yellow and pink. The lotus blooms for a period of about two months, and I have nothing in my garden to compare with its flowers in beauty.

If you are a lazy gardener try water lilies. They require no watering, when everything else is drying up, and no weeding at any time. They multiply so fast with me that most of them have to be dug up every spring, and the increase sells at good prices. Do not grow geraniums, cannas, coleus and the like, when so many beautiful plants can be grown so different from your neighbors.

A Complimentary Contradiction.

A New York publisher has a reputation for employing the homeliest stenographers and typewriters in the city. Efficiency rather than beauty is what he wants, and he knows the prettiest ones are not the most efficient. Just the same it is said of him that he doesn't know a pretty woman he when he sees one. Still, his wife is

an unusually handsome woman. Not long ago she came into his office, where she appears only at rare intervals, and only when it is absolutely necessary. She was met by an office boy, a bright Irish lad, who had never seen her. She asked for Mr.

Blank. "Who shall I say wants to see him.

A Cure for Cold Feet.

An excellent and simple remedy for cold feet is the application of cold water. Step into the bathtub, let the cold water run in a little faster than it runs out. Standing in the water, rub one foot with the other, rapidly, ten or twelve times. Then change and treat the other foot in the same manfor about three minutes. The feet will have become very red, and as you step out of the water, you will find them burning and glowing with the warm blood brought into them by this means.

Some Chinese Baths. A traveler in Mongolia writes:

There are some hot springs on the read about twenty miles north of Chingpeng. The place is named Tangshan.
