The following report from the State bureau of statistics shows some interesting facts concerning our state's growth: The figures compiled by the State Bureau of Statistics show the total combined products of farm and factory in Nebraska during 1905 to have been worth \$511,431,476.42 as compared with \$501,583,190.63 for 1904 which indicates a ten million dollar increase each year. The largest individual item in this compilation is manufactured products at \$177,155,953.

Live stock is valued at \$122,112,084; corn, \$97,485,297; winter wheat, \$25,641,223; spring wheat, \$3,299,406; oats, \$19,638,219; barley, \$2,192,742; rye, \$1,484,707. The dairy products totaled in value \$11,359,964 and poultry products \$10,215,512. The poultry figures are flattering to those engaged in that industry. They do not, of course, include values of blooded and fancy poultry. Other items making up the tabulation are alfalfa, sugar beets, hay, potatoes and "other soil crops."
