THREATENS TO BE GREATEST IN HISTORY.

MINER'S REJECT WAGE OFFER

Permission Will Not Be Given for Districts to Sign Separately-The Convention Provides for Raising a \$6,-500,000 Strike Fund.

INDIANAPOLIS, Ind.-The rejection of the counter proposition offered by the coal operators of the central competitive district by an almost unanimous vote of the rational convention of United Mine Workers and the adoption of a resolution offered by Secretary W. D. Ryan of Illinois placing the miners on record as a unit in refusing to sign an agreement for any district until an agreement was signed for all districts under the jurisdiction of the United Mine Workers has created a situation which in the opinion of the officials of the miners' organization will result in a disruption of the joint agreement and possibly one of the greatest strikes of organized labor the country has ever known, beginning April 1.

The action was taken during a called session of the mine workers' national convention, which was called to order immediately following a short session of the joint conference of the operators and miners, during which the joint scale committee reported that it had been unable to reach an agreement on any of the principal questions involved and after F. L. Robbins of Pittsburg. floor leader of the operators, has replied to President Mitchell's question that the operators had no further proposition to lay before the miners, concluding his remarks with the statement that if there was to be an interruption of the joint agreement he wished the responsibility for such a severance of relations to be placed upon the miners.

The counter proposition submitted by the operators, which was said to be their ultimatum, provided for the signing for another year of the present wage scale with certain modifications to reimburse the Illinois operators for expense incurred under the "shot firers" bill now effective in that state.

Immediately following the rejection of the operators' proposal the convention set about to provide means for accumulating a strike fund of \$6,500,000 in addition to a like amount now on deposit in the international, district and sub-district treasuries of the miners' organizations.

To provide for an emergency, Secreminers within their jurisdictions for been disabled in the service.

tion was completed Friday by the election of the following officers, named by the executive committee: Secretary, T. W. Tomlinson, Denver; treasurer, W. E. Hughes, Denver: attorney, Sam H. Cowan, Fort Worth, Tex.

After adopting several resolutions, including one endorsing the Hepburn rate bill and another pledging the association's support to President Roosevelt in his forestry reserve plan, and listening to speeches on railroad rate legislation, the convention adjourned. The text of the resolution on the public land question follows:

United States has made the forest reserve policy a permanent and fixed function of the government, and such reserves are now in practical operation in various sections of the country under the administration of the secretary of agriculture, and bureau of forestry; therefore, be it

some of the phases of the strike situation. "Never in the history of this country has a strike of such far reaching effect been threatened," said Mr. Mitchell. "It means a national suspension of mining if the strike comes on at the expiration o our mining contracts, March 31, and it includes the

anthracite districts." "Will this action of the miners, in cluding the anthracite districts, in order that no contracts shall be signed until all obtain agreements, have any effect on the meeting of the anthracite miners and operators on February 15?" "I don't know at this time," he said.

"Will you meet the anthracite operators at that time?" "Yes," he replied, "that is the plan

at this time and no changes have been made in the plans." According to the figures given out by the national officers of the miners organization they expect this strike to bring out over 600,000 men, about 150,000 non-union miners in West Virginia and rennsylvania with the 450,-000 union miners. Of this number

about 150,000 will be out of the anthracite districts, 85.000 in the Pennsylvania bituminous districts, 38,000 in Ohio, 17,000 in Indiana, 50,000 in Illinois, 16,000 in Iowa, 37,000 in West
