"States." In this letter I propose to show by extracts from my note book that thousands who have come up here from the "States" have succeeded far beyond their most canguine expectations.

Mr. N. E. Beaumunk of Brazil, Indiana, was earning \$100.00 per month with a coal company. At about the age of 40 he had saved about \$3,000. Four years ago he landed near Hanley, Sask. He now owns 480 acres of land. Last fall (1905) he threshed 4,700 bushels of wheat and 3,100 bushels of oats. His wheat alone brought him over \$4,000, which would have paid for the acres that it grew on. He is to-day worth \$15,000.

This is Making Money Fast. In Feb. 1902, J. G. Smith & Bro. were weavers in a big cotton mill in Lancashire, England. Coming here they arrived in Wapella, Sask., with only \$750.00 between them. They were so "green" and inexperienced that all they could earn the first summer was \$6.00 per month, and the first winter they had to work for their board. The next year, 1903, they took homesteads, and by working for neightors, they got a few acres broken out, upon which the next year they raised a few hundred bushels of wheat and oats. They also bought a team and broke out about sixty acres more. In 1905 they threshed 1700 bushels of wheat from it, and 1300 bushels of oats. Their success being then assured they borrowed some money. built a good house, barn and implement shed, and bought a cream separator, etc. They now have a dozen cows, some full-blooded pigs and chickens, good teams and implements to match, and are on the high road to prosperity. Here are three cases selected from my note book from among a score of others. One a mine boss, one a farmer, and one a factory operator. With each of them I took tea and listened to their story. hoped to better my condition." said one. "I thought in time I might make a home," said another. "I had high expectations," said the other, and all said that "I never dreamed it possible to succeed as I have."

Like Arabian Nights. The word oxygen had been used. Im- hotels and in the family I have been mediately one of the girls rattled out told successes that reminded me more glibly: "I know-oxygen, hydrogen, ni- of the stories in the Arabian Nights trogen." "Well, what do you know about than of this matter-of-fact workaday them?" asked the nurse. "Oh, I don't world. Yields of wheat from 35 to know nothin 'about 'em, but we learnt 53 bushels per acre, and of oats of from 60 to 100 bushels, are numerous in every locality and well authenticated. At Moose Jaw, Lethbridge, Calgary, Edmonton, Regina, Brandon, Hanley and many intermediate places I saw cattle and young horses fat as our grain-fed animals of the "States" that had never tasted grain, and whose cost to their owners was almost nothing. At Moosomin I saw a train load of 1,400 steers en route to England, that were shaky fat, raised as above stated. If the older generation of farmers in Indiana, who have spent their lives in a contest with logs and stumps as did their fathers before them, could see these broad prairies dotted with comfortable homes, large red barns, and straw piles innumerable, and the thriving towns with their towering elevators jammed to the roof with "No. 1 hard," | York Life of the recent investigation and then remember that four or five years ago these plains were tenantless but for the badger and coyote, they would marvel at the transformation. Then if they followed the crowds as sioners were allowed a per diem and they emerged from the trains and an expense of \$5 per day for the time hurried to the land offices, standing in line until their respective turns to be waited on came, and saw with what rapidity these lands are being taken, they would certainly catch the "disease" and want some of it too. If these lands are beautiful in midwinter, with their long stretches of yellow stubble standing high above the snow, what must they be in summer time when covered with growing or ripening grains? Speaking of winter reminds me that our Hoosier friends shrug their shoulders when they read in the Chicago and Minneapolis dailies of the temperature up | Wood appears to have misjudged the here. For that very reason I am here this winter. The Canadian literature, with its pictures, half tones and statistics, gives a good idea of her resources, but thirty or forty degrees thrown under the same. His head below zero sounds dangerous to a Hoozier, who nearly freezes in a temperature of five above, especially when accompanied by a wind, as it often is, but the fact is, when it is very cold here it is still and the air being dry the cold is not felt as it is in our lower latitudes, where there is more humidity in the atmosphere. I than the one I am spending up here. I arrived in Winnipeg Nov. 9, and have not had the bottoms of my overshoes wet since I entered Canada. Under a cloudless sky I have ridden in sleighs nearly a thousand miles, averaging a drive every other day. Stone masons have not lost a week's time so far

TWO WAYS OF LOOKING AT IT.

Some Would Say Strength of Character and Some Obstinacy. Strength of character may be shown in many different ways. Mary Lizzie Carter had a way of her own. "I can just tell you, Mary Lizzie has what I call a real strong character," said one of the young woman's friends to her mother. "She's got determination and perseverance and a lot of other fine things."

"Indeed, how does she show all these splendid traits?" asked the admirer's mother, who had been accustomed to think of Mary Lizzie as a frivolous and selfish young woman.

"Why, she wanted to go skating this afternoon, and it just seemed as if everything went wrong," said the admirer. My head ached very badly and I was seized with vomiting spells whenever I took any food. A doctrouble gastritis, but he gave me no relief. Then I tried a second doctor without benefit. By this time I had become very weak. I could not keep the most delicate broth on my stomach, and at the end of a month I was scarcely more than skin and bone and was really starv-

ing to death. Then I recalled how much benefit my sister had got from Dr. Williams' Pink Pills and decided to take them in place of the doctor's medicine. It proved a wise decision for they helped me as nothing else had done. Soon I could take weak tea and crackers and steadily more nourishment. In two weeks I was able to leave my bed. Dr. Williams' Pink Pills were the only thing that checked the vomiting and as soon as that was stopped my other difficulties left me. I have a vigorous appetite now and am able to attend to all the duties of my home. I praise Dr. Williams' Pink Pills for Pale People to all my friends because

I am thoroughly convinced of their Dr. Williams' Pink Pills are sold by all druggists and by the Dr. Williams Medicine Co., Schenectady, N.Y.
