A gentleman by the name of Miller who is digging a well for a Biedinger north of town, had a narrow escape from serious injury one day this week. He was down in the well digging and Mr. Bedinger and John Fisher were drawing the dirt out with two large tin buckets. Miller was careless in attaching one of the buckets to the rope and when it neared the top of the well, the bucket fell to the bottom, but as luck would have it the bucket struck on the side of the well in such a way as to cause it to glance to one side and only strike the digger on the shoulder without much injury. The bucket weighed about 100 pounds.

On Saturday Mr. McKillip sold the stock of general merchandise to Smith & Co. 80 acres of land near Platte Center to William Pilleu for \$95 per acre, 120 in the same neighborhood for \$93.50 to Henry Jackson and 390 acres north of Humphrey to William Labenz.

A dose of Pine-ules at bed time will usually relieve backache, before morning. These beautiful little globules are soft gelatine coated and when moistened and placed in the mouth you can't keep from swallowing them. Pine-ules contain neither sugar nor alcohol—just gums and resins obtained from our own native pine forest, combined with other well known bladder, kidney, blood and backache remedies. Sold by McClintock & Carter.

Double-Breasted J-I CASE PLOWS

FARMER'S ENCYCLOPEDIA FREE! We are now having our most valuable volume prepared for the farmer. It contains all the information you need on raising crops, stock raising, and all the latest news and news of the day. It is a book that every farmer should have. We will send you one free if you will send us your name and address. Simply answer these four questions and we will send you the Encyclopedia free. 1. What crop do you raise? 2. What stock do you raise? 3. What kind of plow do you use? 4. What kind of harrow do you use? Send your name and address to J. I. Case Plow Works, Dept. 1, Racine, Wis.

You never heard of a double-breasted plow—did you? Yet it is one of the features that have made the J. I. Case plows famous.

You'll find this feature right where the mold board joins the share—where the wear is greatest—where the ordinary plow gives out quickest.

The double-breast is an extra thickness of steel put on by a special process of our own—hardened so the life and wear is there to resist the heaviest kind of work. You'll find it on every style of plow we make—walking, sulky and gang. That's why the life of a J. I. Case Plow is one-third longer than that of ordinary plows. That's why, in the long run, you save money by buying a J. I. Case Plow.

The good points, the exceptional points in J. I. C. Plows are so numerous that we ask the privilege of telling you more about them. We especially want to tell you about the new high foot-lift Sulky. It's self-leveling—a real foot lift. And we want to tell you about the celebrated Triumph Sulky and Gang—with their wonderful horse-saving, light draft, comfort-to-man-and-beast features. And we make other implements—harrow, platters, cultivators, which we cannot describe here, but which you ought to know about.

In order to make it more than worth while to get this information we offer you an extra inducement to have you write us about your implement needs, and for catalogue.

Read the Encyclopedia offer in the panel opposite. Then sit down—now—and write to us. Address
