Refrigerators...

No use in getting any but a good Refrigerator. One that has thorough ventilation—good cold air circulation—and at the same time is economical in the use of ice; well made on scientific principles that best accomplish their object—keeping food sweet and fresh. We have the best line of refrigerators we ever assembled. And it isn't a bit too early to get one. Best be ahead of the time when it gets warm enough to injure food.

THE HERRICK REFRIGERATOR

White odorless spruce lined, have become very popular, and with the many improvements for this season makes this sanitary system of cold, dry air refrigeration, excellent insulation, etc., etc., one of the finest medium priced refrigerators on the market. The white odorless spruce is highly sanitary and is especially adapted for refrigerator linings, as there is no possibility of odor, which is shown in the fact that butter, which is highly susceptible to odor, can be kept in direct contact with the spruce without taking any taint whatever. This sanitary spruce lining is a great improvement over the poisonous zinc linings which in connection with milk or other susceptible articles usually kept in the refrigerator, but since our refrigerators are perfectly dry inside they do not require the metal lining and we therefore use the choice white spruce in preference, it being highly sanitary and always sweet and clean.

Refrigerators from \$10.00 up.

Lawn Mowers.....

Time again for lawn mowers. Give the lawn your careful attention at the first of the season and you will find it twice as easy to keep it in prime condition till the snow blows again. To do this you must have a lawn mower. And, of course, you want a good strong one that will give the most satisfactory service for the longest time. If these points, together with very low prices, will interest you, our new stock of dependable lawn mowers will please you.

Lawn Mowers from \$3.50 up.
