The magazine for the woman who sews, "Style and American Dressmaker" has a beautiful evening scene on the front cover of the August number. There are several designs of The Peter Pan Dress, which has already proven so popular. There are also many good suggestions for fashions for the late summer and early fall. The children's fashions are unique and original and cannot be duplicated anywhere, and through their agency alone, the magazine should find favor with women who make children's clothes. The young girls will find a new department which will interest them; Embroidery designs. In fact, the whole magazine is replete with clever ideas for the woman who sews. Send 10c for sample copy, or \$1.00 for year's subscription to Style and American Dressmaker, 24 26 East 21st Street, New York.

SPECIAL EXCURSION TRAINS TO DAVID CITY SUNDAY JULY 22 and 29 VIA BURLINGTON ROUTE LEAVE COLUMBUS 9 A. M.

Right Paint at the Start

Pure White Lead and Pure Linseed Oil should always be used for the first or priming coat. No other paint has the same affinity for the surface—marring and becoming a part of the wood.

Yellow ochre, barytes, zinc or any other substance than Pure White Lead fails to unite with the wood and serves only to form a cushion, which will prevent even Pure White Lead from attaching itself when finally applied.

Satisfactory results can never be obtained so long as a surface is coated with a covering (for that is all it is) of yellow ochre, barytes, zinc, etc. Such a coating is bound to crumble, crack and peel, and must be scraped off, down to the wood itself, before a good job can be done—an expensive process, and not without danger of fire.

A house owner can scarcely make a more costly mistake than to use a substitute for Pure White Lead in the priming coat. Avoid all risk by using

Collier, Red Seal or Southern

Made by the Old Dutch Process

Send for a booklet containing several handsome reproductions of actual houses, showing valuable suggestions for a color scheme in painting your house. A test for paint purity is also given.
