Dyspepsia Is Often Caused By Catarrh of the Stomach-Peruna Relieves Catarrh of the Stomach and Is Therefore a Remedy For Dyspersia.

Hon. M. C. Butler, Ex-U. S. Senator from South Carolina for two terms, in a letter from Washington, D. C., writes to the Peruna Medicine Co., as follows:

"I can recommend Peruna for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved. It is indeed a wonderful medicine, besides a good tonic."

CATARRH of the stomach is the correct name for most cases of dyspep-sia. In order to cure catarrh of the stomach the catarrh must be eradicated Only an internal catarrh remedy, such as Peruna, is available. Peruna exactly meets the indications.

German Life Insurance. According to the Cologne Gazette, there are in Germany more insurance policies than inhabitants-80,000,000 policies, as against a population of under 60,000.000; which shows that a large proportion are insured in two or more companies. The indemnities paid by German insurance companies amount to about \$24,000,000 a month.

The Court Took Judicial Notice. A New Jersey correspondent contributes the following in regard to a recent happening in the court of a local magistrate:

A justice in this city, upon complaint, issued his warrant for an alleged violation of an ordinance of the city relative to the registering of dogs. The complaint and warrant were both bad. Upon the defendant being brought before him, the justice said: "How do you plead, guilty or no. guilty?" to which the defendant, who was allowed no time to obtain counsel, replied: "Not guilty." The justice then said: "I know a G- dsight better. I fine you five dollars and \$2.80 costs." These words constituted the entire hearing, and, needless to state, certiorari proceedings are now pending.

Vesuvius Dust Traveled Far. Paris was overspread with a dry, yellowish fog the morning of April 11 of this year. A sicentist, believing that the fog had been caused by the eruption of Mount Vesuvius, placed upon the roof of his dwelling a series of plates covered with glycerin to catch the dust in the fog. It was found that part of the deposit on the plates was a very fine sand, completely identical with the ash sent up by Vesuvius in 1822. In addition to this sand the fog contained some perfectly spherical globules of oxidized iron.

DEER FEED ON PEACHER.

Connecticut Farmers Restive Under Depredations.

While the Connecticut farmer is sleeping snugly curled up in his best mortgage, along comes a mild-eyed and wild-toothed deer and drags from the sagging limbs bushel after bushel of peaches. Statistics as to the capacity of a deer's stomach not being at hand, it is impossible to estimate the exact amount of damage per deer per peach per farmer, but the total is so much that the attorney general of the state was appealed to to decide whether or not peaches are crops, says the Boston Advertiser. He says they are, and the farmers are beginning to try to collect damages from the state, which protects the deer until 1911. As a matter of fact, and aside from considerations of peach advertising, the animus of the agitation undoubtedly is the restiveness of the Connecticut smooth bore, which rusts on the wall, waiting for a snack of venison. Undoubtedly there will be introduced into the legislature of Connecticut this fall bills looking toward the opening of the deer season before 1911. The Connecticut farmer (backed by those city folks who are making use of him to further their own ends) would rather get a shot at the deer than to continue to get from the state in damages a better price than he could ever get for his peaches in the
