Coeducation.

poetical fame is, therefore, strictly na-

All institutions which have been es tablished by the state for higher education should provide for the education of both men and women, and it is a decided gain to have this work done by one institution rather than by two -and there is no serious objection to the education of men and women in the same institution that has been established for both, says Cyrus Northrup, president of the University of Minnesota, in Collier's. The boys and girls grow up together in the same family; they go together to the same graded school; they go together to the same high school; they go together to the university, and coeducation in the university does not seem to any of them any more strange or unnatural than coeducation in the lower schools has seemed strange. So far as the infinence of the men upon the women, or the women upon the men, is concerned, I am quite certain that the result in general is good. The men are made more gentlemanly, and the women, while having all the frankness and freedom of the home life and the school life, never lose the refinement which belongs to them as women. I have no sympathy whatever with the -what shall I call it?-sentimentality which seeks to segregate the women and shut them in by themselves in the work of education.

Earthquake shocks were felt in four continents in the six days between April 14 and 19. They began with destructive shocks in Mexico by which three towns were ruined. Then Spain. Russian Transcaucasia and Constantinople felt the tremors, and there were shocks at Manila and Charleston, and volcanic eruptions accompanied by earthquakes manifested themselves in Chile. It is interesting to note, says Youth's Companion, that these shocks, with the exception of the one at Charleston, occurred in the recognized earthquake belts, one of which encircles the Pacific ocean, and the other goes about the earth by way of Mexico, the West Indies, Spain, Italy, the Caucasus, northern India, the Philippines and the Pacific islands.

So many school children have been found with defective eyesight that the school committees of several cities have considered furnishing eyeglasses free. It is a question how far government should go in supplying citizens with the necessary things of life. Most American parents will prefer to pay the oculist. In many cities are free dispensaries where poor children can be treated and receive free prescriptions for glasses. Parents should be warned against incompetent oculists who take advantage of the reports of the boards of education on the matter of eyesight in the schools, and try to get business for themselves by exaggerated warnings to the "parents of school children threatened with blindness."

"Psychic epilepsy" has succeeded brain storm as a medical term. A New York physician has just been cleared of the charge of brutally assaulting a man and woman on the street on the plea that he had been subject to attacks of psychic epilepsy from childbood, and that on recovery he had no knowledge of what had occurred. Just epilepsy is not made clear, but it will more generally by people residing in The agent does not ask that the farmmalady in criminal procedure.

HOW COOPERATION OF THE PED PLE OF A COMMUNITY WING.

STICKING TOGETHER COUNTS

Things in Clannishness as Found in Some Agricultural Die

Often is heard protest against what is called clannishness among foreigners who become citizens of the United States. It is claimed that they carry old-country ideas with them to the new land, and refuse to mingle with other than their own nasionality. In defense of these foreigners who are thus charged, it is but fair to say that many of them labor under the misapprehension that they are not looked upon by the older American citizens of a knowledge of the English language makes their own class desirable associates. It will be observed that in one or two generations condi-

among the people than can be found in any like area of the United

made that the wealth produced by members should be retained. Mills were gradually built for the conversion of the grain into flour, wine presses were found on almost every homestead, and towns were built. Among the first institutions established were schools and churches, and these to-day are prominent factors in the molding of the character of the

eny to assist one another. Each one

while working for himself and his family, realized that it was to his advantage to patronize his neighbor. Thus when the towns were started and stores opened, it was made a rule that these stores be patronized and that the store-keeper be allowed a fair profit for the goods he sold. Tailor shops, boot and shoe makers, soap makers, and even the brewers of beer found their customers solely among the members of the colony. Although St. Louis was within a few hours' ride, the members of the colony considered that the dollars kept in the little town instead of being spest in St. Louis meant much for the advancement of the place. As years passed by members of the colony became prosperous. Families were reared and children married, additional homesteads were secured and there was a thorough cooperation among all towards making life agreeable and giving each member of the community a means of acquiring a competency. One of the early undertakings was the building of macademized roads. These roads to-day are kept county. Schools and churches, which at first were roughly built, have been replaced with magnificent edifices which are sources of pride to the residents of the community. Some of the small business places of 40 or 50 years ago have grown to be of almost national importance. In fact all residents of the community are independent, and a few of them possessors of great wealth. How success ful they have been is shown by the absence of paupers in the county. There are no public charges, neither is there any great expense as to maintaining a county jail.

in the Mississippi valley and throughout the west. Such communities have been built up solely by the simple adherence to cooperation among members and a following out of the hometrade principle. Members realized that every dollar earned in the community and sent to some other place robbed the community of so much wealth, and that this dollar ceased to be a factor in increasing the importance and progress of the place. In these communities are generally located flouring mills. The output of these mills finds local sale and the surplus is sent to the markets to bring in money from the outside. It appears that if the simple economical methods of many classes of citizens losses to the people. Yet there is an under-current at work, an awakening

OPPORTUNITIES NEAR HOME.

Progressive Towns Offer Excellent Advantages for Young Men.

Students in sociology have recent chances for the success of young men of country districts. There has been no denying of the fact that the farm affords a splendid opportunity for those inclined towards a pastoral life, but it is maintained that of recent years conditions preclude any greet chances for the average young man to succeed in the average business vocation. That is that the channels for his development are being made more narrow year after year through the formation of corporations and trusts for the control of various industries. In other words, the centralization of business is considered detrimental to the pursuing of business in mercantile lines on a small

This subject is open to wide discus-

sion. Cities and towns of the United States are rapidly building up. The population of the country is increasing wonderfully. With this increase as companionable. Often their lack in population new opportunities present themselves for the exercise of intelligent endeavor. The towns, particularly of the west, are embryo cities, and the little village of to-day tion changes and the children of these will be the large city a quarter cenforeigners become thoroughly Amer- tury hence. Almost every town affords the progressive young man a It would be well if some of the chance for business success. COMMON SENSE ECONOMICS.

Simple Principles for Application is Everyday Affaire.

He who aims to be fair toward his neighbor will not deny him the opportunity to make an honest living. The day laborer should be as well rewarded, according to his work, as is the merchant or the banker.

Merchants are shortsighted when they will order potatoes or other vegetables by the carload from another town when right in their neighborhood farmers have just as good potatoes to sell, and perhaps at a lower price. No use in paying the commission man a percentage in a case like

From fruit-growing sections year after year reports come as to the rotting of the crops on account of the poor transportation facilities, or refusal of buyers in the large cities to pay prices sufficient to pay for gathering. Here is an opportunity for the manifestation of local enterprise. Why not start small drying and canning establishments to use up the surin the best of condition and have plus fruit? Such establishments could proved a matter of economy to the be profitably conducted, and operated with benefit to all the people of the community.

> There is little economy for the storekeepers to keep on their shelves goods that are likely to grow out of date, or deteriorate in value. Better sell all such goods at actual cost, and give the people of the neighborhood the benefit of lowest prices.

> People are interested in prices of goods. The wise merchants fully appreciate the value of the home paper as a medium of intercourse with their customers. Well-written advertisements and the naming of prices attract attention, for the average person when his attention is called to an article always wants to know the

One dollar circulated in a community is worth to it \$50 circulated in some other place. A district is made wealthy only by retaining in it the dollars that are earned within it, or which may be brought to it through

Residents of rural communities should beware of traveling agents who are disposing of new-fangled cold air refrigerators. This refrigerator is represented as requiring no ice. All that is necessary is to fill some of the andoubtedly prove to be a convenient various agricultural communities of er even buy this refrigerator, and the United States, it would be whole- represents that he is merely advertissome and that these communities ing it, and desires to place one on Assistant Prof. George A. "One cannot keep up the ceremony and etiquette of society when at home." True, for between friends these can be laid aside. They

The New York Life's Business Nearly

Up to the Legal Limit.

The New York Life Insurance Com-

pany announces that its new paid

business during the half year just end-

ed was over seventy million dollars.

As the new law allows no life com-

pany to write over one hundred and

fifty millions per year, it would ap-

pear that this company is working

nearly up to the limit. The New

York Life gained such headway be-

fore the law was passed and suffered

so little, comparatively, from the Arm-

strong investigation, that the question

with its management has been how to

keep business down to the limit, rath-

er than how to reach it. No other

company is writing nearly as much

as the law allows. The New York

Life has evidently become a pre-

The company's payments to policy

colders during the six months end-

ing June 30 were \$21,660,761. It is

interesting to note that this amount

was almost equally divided between

payments under policies maturing by

leath and payments made to living

policy holders. Thus, while death-

laims were \$11,180,626, the amount

paid for matured endowments, annu-

ities, trust fund installments, for pur-

chased policies and for dividends was

\$10,480,135. Modern life insurance, as

practiced by the best companies, em-

braces a wide field, and covers many

contingencies. It is money saved for

the aged, as well as money provided

for the families of those who die pre-

"Sensible to the Last."
