Is Pe-ru-na Useful WIDENING THE FIELD for Catarrh?

Should a list of the ingredients of Pe runa be submitted to any medical expert, of whatever school or nationality, e would be obliged to admit without reserve that each one of them was of undoubted value in chronic catarrhal dissease, and had stood the test of many years' experience in the treatment of mch diseases. THERE CAN BE NO DISPUTE ABOUT THIS WHAT-EVER. Peruna is composed of the most efficacious and universally used herbal remedies for catarrh. Every ingredient of Peruna has a reputation of its own in the cure of some phase of catairh.

C

Peruna brings to the home the COM-RINED KNOWLEDGE OF SEVERAL SCHOOLS OF MEDICINE in the treatment of catarrhal diseases; brings to the home the scientific skill and knowledge of the modern pharmacist; and last but not least, brings to the home the vast and varied experience of Dr. Hartman, in the use of catarrh remedies, and in the treatment of catarrhal diseases.

The fact is, chronic catarrh is a disease which is very prevalent. Many thousand people know they have chronic catarrh. They have visited doctors over and over again, and been told that their case is one of chronic catarrh. It may be of the nose, throat, lungs, stomach or some other internal organ. There is no doubt as to the nature of the disease. The only trouble is the remedy. This doctor has tried to cure them. That doctor has tried to prescribe for them.

BUT THEY ALL FAILED TO BRING ANY RELIEF.

Dr. Hartman's idea is that a catarrh remedy can be made on a large scale. as he is making it; that it can be made honestly, of the purest drugs and of the strictest uniformity. His idea is that this remedy can be supplied directly to the people, and no more be charged for it than is necessary for the handling of it.

No other household remedy so universally advertised carries upon the label the principal active constituents. showing that Peruna invites the full inspection of the critics.

MAKING GREATER OPPORTUNITY FOR SONS OF FARMERS.

BUILDING UP THE HOME TOWN

Some Causes for Complaint Which Can Be Obliterated by the United Efforts of the People.

How often do we hear it said that the young man has not the opportunity that the young man of a score of years ago had. How great is the complaint of trusts and combinations which control industries to the detriment of the smaller ones in business. and how often is reference made to business concentration in the large cities at the cost of the smaller towns.

Innovations in business methods have been many. It may be said that this is an era of economical methods; that evolution is going on continually broadening the field for individual effort and making possible the operation of mammoth enterprises. There can be no doubt as to the detrimental effects upon small towns of this business concentration in the larger cities. Pessimists deplore the lack of opportunity for the young men of to-day. At the same time the large corporations put forth the cry that there is a scarcity of the right kind of material for important places of trust. However this may be, there is one thing evident, and that is, small towns being kept from advancing narrows the field for the young men who would otherwise enjoy an opportunity to engage in business.

Traveling to the large city for employment, the youth, perhaps, seeks a clerkship at moderate wages. There are thousands of others that he must compete with in the race for success. His field is narrowed. It is not often that he has fair competition, and favoritism he finds is one of the obstructions in his way. One of the cures for this condition is to devise means of enlarging the scope and importance of the so-called country towns.

There is no economical reason why the large city should have the business that rightfully belongs to the small town. There is no saving in buying goods at a distant point even though a small percentage may be saved directly. Whenever a resident of a community sends his money to some other community for the necessities that he requires, he robs his

OPPRESSION IN FOREIGN LANDS. Laborers Reduced to Slavery Through Systems of Land Helding.

Americans should be thankful for the liberty that their form of government allows. It is only necessary to study into conditions as they obtain in many of the European countries, to learn how enslaved are the common classes of the people of those countries. The holding of vast estates by the nobility has reduced the 'peasant classes to a condition of seridor

In these countries it is also notice able that the artisans, and the workers in the mills, receive wages that are barely sufficient to buy them food and clothing. In many of the continental countries of Europe the farm laborer receives as compensation from \$1 to \$1.50 a week. In Silesa, where there are large cotton factories, expert weavers receive from \$2.28 to \$3 per week, and women employed at like work earn less than \$2 per week. Even in Old England, where labor is paid the best of any European country, in the cotton factories the scale for labor runs from \$4.86 to \$10.20 a

week. Where wages are so low it is impossible for the people to save money, and it is necessary that they live upon the plainest and cheapest food in order to make ends meet. In comparison with these countries how grand are the opportunities for

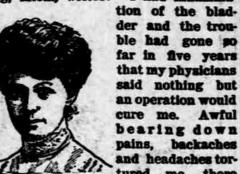

the laborer in the United States! In America there are homes for all who would build them. In no part of the earth is there such reward for individual effort. It is said by some that there is a tendency even in this free country toward oligarchy. That the tendency towards the concentration of financial power and business in the densely populated districts is a menace that is too lightly estimated. The preventive remedy for this evil lies in the hands of the masses. There is great need of the people in general studying more deeply into economic subjects. The simple principles upon which business rests appear to be little understood by the average citizens. The remedy for the prevention of the building up of one section of the United States at the cost of another section is readily at hand, and each and every citizen can do his part in

administering this remedy. For many years great insurance companies have maintained their headquarters in large eastern cities. Millions upon millions of dollars annually were contributed to them by the people in all parts of the United States. The vast funds built up for the protection of policyholders had to seek profitable investment. The great

HAD MISSED GOOD THING.

Patrick's Joy Dimmed by Thought of Wasted Opportunities.

Patrick, recently arrived and unused to the ways of this country, was accosted one day by a member of the sporting fraternity, who offered to impart to him, for a modest consideration, a marvelous way to make money without toiling for it. All one needed, he said, was a small amount to bet on a certain horse that couldn't possibly lose. "And yez say Oi can get that money without working for it?" asked the bewildered Irishman, when the other was through explaining. "Sure thing. All the work you got to do is to count the mazuma." "Ill thry it," said Pat. So they hied them to a racccourse, where the sporty-looking gentleman placed Pat's money at odds of five to one. And the horse won! Pat's joy was unbounded when he was handed a large roll of yellow-backed bills. Calling his new-found friend to one side, he asked in a voice that trembled with excitement: "OI say. how long has this thing been goin' on?"

Dr. McCosh's Impression.

"Ah, I have an impression!" exclaimed Dr. McCosh, the president of Princeton college, to the mental-philosophy class. "Now, young gentlemen," continued the doctor, as he touched his head with his forefinger, "can you tell me what an impression ie 93 No answer.

"What; no one knows? No one can play?" tell me what an impression is?" ex- "Don't wanter," the

FIVE FALL INTO GRAVE.

Remarkable Incident That Disturbed mity of Funeral.

Instead of the accustomed quiet which prevails at the burial of the dead, great excitement and fear attended the burial the other day of Michael Sereno, a prominent merchant

W. N. U., OMAHA, NO. 31, 1907.

Poor Paint is Expensive

If one is rich enough to repaint his buildings every year for the pleasure of having a change of color scheme, the quality of the paint used may cut little figure. But if it is desirable to cut the painting bills down to the least amount possible per year, it is of the utmost importance that the paint be made of Pure White Lead and the best of Linseed Oil. There are imitations in the form of alleged White Lead, and there are substitutes in the form of ready-prepared paints.

We guarantee our White Lead to be absolutely pure, and the Dutch Boy on the side of every keg is your safe. guard. Look for

own home town of a certain amount of business. Employment is given to the people of the large city instead of the people of the local community.

It has been estimated that more than 50 per cent. of the trade goes from some communities to larger cities. If this trade were given to the home town, it would immediately double its business importance and give a corresponding increase in employment for the people. This means that the population of the town would be increased and the opportunity for engaging in business would be greater. Not only this, but it is an established principle that values of farm lands to a great extent are dependent upon the activity of the town near which the farms may be located. Thus it is plain that if the sons of farmers to them for engaging in business, it can be increased by closely adhering against the contributors. What holds to the home trade and home protection principle, which widens the local field for individual effort in a business

HELPS FOR TOWN BUILDERS.

way.

Strangers to a town form their opinions as to its people by the appearance of the business places and the residences. In a town where the | a state to greatness makes lighter the buildings are dingy and dirty, and the burden of taxation upon all the people show windows of the stores are carelessly arranged, it is evidence that there is a lack of enterprise. It pays the business men of a town to be care- how the concentration of business and ful as to the exterior appearances of of money can be prevented by a simtheir places of business.

Small towns usually contain but few in each community as far as possible expensive residences. It matters little all the wealth produced within that how inexpensively built residences are community. If this principle be closeif the buildings are kept well painted | ly adhered to it will be impossible for and the yards neat and clean. This any acquirement of such vast power is evidence of the good taste of the as will oppress the American people people. . .

there are hitching nosts placed here and there before the stores. It is generally the case that where the hitching post is found, unless the street is well paved, there is a mud hole. Every town that is incorporated should have regulations as to the placing of hitching posts indiscriminately in the streets. There should be set aside some side street that is convenient to the business portion of the town, where the farmers and others can hitch their teams instead of in front of the stores.

Good sidewalks give the strangers to a town a favorable impression of the place, and also they are an advantage in many ways and may prove a matter of economy through the prevention of accidents that might give cause for damage against the town corporation.

Nearly every small town has its public park. It is often noticed that these parks are little cared for. They

aptains of finance evolved means for the employment of this capital. A dozen small industries independently conducted would be combined into one company, capitalized far up in the millions and the money contributed

to the funds maintained by the insurance companies utilized in carrying out the plans of the great combinations. Thus it can be seen how trusts have been built up and the money of the people used for this purpose, and too often to oppress the very classes that contributed the funds which made it possible for bringing into existence these combina-

Need a Good Bank.

A good bank is a valuable asset for the small town. During these days of prosperity people of almost every community have a surplus amount of money to deposit in the bank, or to invest in a way that will bring a fair margin of interest. Lately a system has grown up of doing a banking business by mail. Alleged savings banks and investment companies in large cities advertise widely offering six to seven per cent. interest on deposits. Many who have little knowledge of financial affairs make deposits in these banks. The Lincoln bank at Oak Park, Ill., was one of these institutions that made great offers to the people of agricultural districts in order to secure deposits. More than \$1,000,000 were deposited by farmers and others in this concern. Within a

year it was declared unsound by the United States authorities, the promoter of it placed under arrest and charged with fraud.
